ILL WIND FRIENDLY

Miss Helen Taylor Is Coming Home To Visit, After Rapidly Achieving Success.

Miss Helena S. Taylor, a former well known London South girl, prominent in musical circles in the city, has excellent reason to believe in the old adage, "It's an ill wind that blows nobody good." In the years she has been away from London, she has tested it out most satisfactorily for herself.

Possibly to numbers of her friend nere it is news that she is instructor in dietetics in the Royal Columbian Hospital Training School for Nurses, New Westminster, B. C.

A "career." in the sense of making a place for herself in the ranks of women who are doing important things, was possibly the last thing in the world which occurred to her complished planist, it might be expected that she would turn to music if she wanted to do anything profes-

AS A CHILD SEES.

Every father has been shocked at some time or other by discovering his child's opinion or impression of him. He recognizes what he knows to be but an immaterial phase of his character, a mere idiosyncrasy, and wonders how the child came to believe it characteristic of him. He is hurt to find his child so unappreciative.

grow up big I am going to have a big chair and a book and a big box of candy and I'm going to eat 'em and set on a big chair and a book and a big box of candy and I'm going to have a big chair and a book and a big box of candy and I'm going to have a big chair and a book and a big box of candy and I'm going to have a big chair and a book and a big box of candy and I'm going to eat 'em and she blew out her cheeks and pushed out her front in a ludicrous imitation of her mother.

difference. Instead of starting at the waist line or the hip, it starts at a point rather high on one side of

ative.

What do children see when they look at us? That is rather important when we remember that what they see often they are likely to become through practice.

Children see only what their experience has taught them to see They see only what they have a background for and understand on the basis of that background. They see with their minds, which are made of experiences.

Children love candy. It would never a wful."

There was nothing awful about rocking and eating chocolates to the mind of the child. She thought that would be blissful. The idea that it was not just the thing was in her mother's mind. Besides she didn't like the idea of being so "big" as the child described it. The child saw as she had, experienced. She was not sitting in judgment on her mother.

Why cannot they see the fine things you do rather than the less desirable ones? Because they haven't with their minds, which are made of experiences.

Children love candy. It would never do to let them eat all they wanted of it, and the usual formula is: "Two pleces. No more. No. You will make yourself sick. Too much candy is not good for you."

A lady who had a little daughter that was forced to hear this formula often liked to sit in a rocker and read a book and eat chocolates from a box on the little table at her elbow. Every afternoon when she had changed her dress she settled herself for an hour "of solid comfort." She was rather stout.

One afternoon as she sat and rocked and nibbled, she became conscious of her little daughter's voice. She
