What is Catarrh?

Catarrh is a mucous purulent discharge caused by the
presence and development of the vegetable parasite
amoeba in the internal lining membrane of the nose.
This parasite is only developed under favorable cir-
cumstances, and these are: Morbid state of the
blood, as the blighted corpuscle of tubercle, the germ
poison of syphilis, mercury, toxemia, from the reten-
tion of the effete matter of the skin, suppressed pers-
piration, badly ventilated sleeping apartments, and
other poisons that are germinated in the blood. These
poisons keep the internal lining membrane of the nose
in a constant state of irritation, ever ready for the
seeds of these germs, which spread up the nostrils and
down the fauces or back of the throat, causing ulcer-
ation of the throat up the eustachian tubes causing
deafness, burrowing in the vocal cords, causing hoarse-
ness; usurping the proper structure of the bronchial
tubes, ending in pulmonary consumption and death.

Many attempts have been made to discover a cure
for this distressing disease by the use of inhalations
and other ingenious devices, but none of these treat-
ments can do a particle of good until the parasites are
either destroyed or removed from the mucous tissue.

Sometimes since a well known physician of forty
years' standing, after much experience, succeeded in
discovering the necessary combination of ingredients,
which never fails in absolutely and permanently erad-
icating this horrible disease, whether standing for
one year or for forty years. Those who may be suffer-
ing from the above disease should, without delay,
communicate with the business manager of MESSRS.
A. H. DIXON & SON, 305 King Street West, Toronto,
