Spring Purity

To brew good ale pure, hard water is an absolute necessity.

The solvent powers of water are so great that few springs produce water pure enough for brewing.

Carling's springs were discovered after many years of searching, and the brewery established only when Government analysts deposed that the water never tested less than 99.08 degrees pure.

Ask for Carling's Ale—accept no other, because no other is quite so good.

Carling's Ale

The Ale that's Always Pure
