A Curlous Case.

MONTREAL, May 6 .- An action has just been entored in the Superior Court here that will no doubt cause a good deal of comment in banking and legal circles.
Twelve years ago lamis E. Poulin entered the employ of the Banque Nationale, and for a long time past has been acting as paying teller in that institution, from \$75,000 to \$100,000 per day passing through the young man's hands. Poulin, who was 32 years of age and had a wife and three children, was guaranteed by a certain corporation doing business in this city. Although the teller's accounts were all right the guarantee company

When this information reached the bank manager the employe was at once dismanager the employer was at once dism charged. The latter went to work, however, and succeeded in proving to the bank's satisfaction that he had never played in his life, and in fact the corporation soon discovered that an unfortunate error had been committed, it being a namesake of the gentleman in question who had been tracked to these gambling resorts. In the meantime the teller's place in the bank had been filled, so Mr. Poulin, through his attorney, Mr. Ed. Guerin, has taken action against the guarantee company for \$25,000.

While Lord Salisbury suggests a different mode of procedure from that embodied in the sixth quation, the President does not understand him actually to object to the question, and he, therefore, assumes that it is agreed to. The six questions, as now proposed by the President, as rollows:—
