

As one of Canada's largest technology development centres, the Canada Centre for Mineral and Energy Technology (CANMET) of Energy, Mines and Resources Canada offers you the advantage with our three keys to success.

1 People

Our six research laboratory groups are staffed by more than 500 professionals and technicians. Their dedication has won them awards and recognition in all areas of minerals, metals and energy research and development.

2 Facilities

CANMET boasts an impressive number of state-of-the-art facilities including a pilot-scale foundry and rolling mill; mineral, heavy oil and bitumen processing plants; facilities for rock mechanic studies; a 10 tonne per hour coal cleaning plant; and advance analytical equipment.

3 Programs

When you work with CANMET, a variety of research programs are available to you. You can participate in joint research or cooperative programs, or let us assist you in accessing government-sponsored technology development funds.

If you have innovative ideas you'd like to explore, turn to CANMET. Let the keys to success open new opportunities for you.
