

any of the Mines in this country; the ores are sulphurets, valuable to smelters for fluxing other ores with economy. The location is unsurpassed for mining purposes; a fine harbor, abundance of timber for mining purposes, perfect drainage for the first ten fathom adit level, a sufficiency of arable land, a delightful and salubrious climate, ready access to market and civilization by steamer or sail, and free from the objection of the Lake Superior Mines of distance and transportation by land, and with their success before us, we have but little to fear for the result of the Copper Bay Mining Company.

A. RANKIN, *President.*

MONTREAL, JULY 7th, 1853.

STATEMENT
