—Main Floor—Centre.

THE T. EATON CO. LIMITED

DR. HASTINGS LAUNCHES PURE FOOD CAMPAIGN

Milk, Meat and Fish to Be Rigidly Inspected—Clean Up of Back Yards.

Dr. Hastings, medical health officer, yesterday presented a report to the board of control as to his proposed scheme for the spring cleaning of yards and cellars, and expenditure for laboratories and inspection of milk, meat and fish. He also asks for \$30,000 for the spring cleaning. Twenty-five inspectors are requested for this purpose, as compared with 12 previously employed.

The milk inspection will involve an expenditure of \$5,000. The inspectors will not only make a thorough investigation of the sanitary conditions in all places where milk is sold, but will also make inquiries as to the existence of communicable diseases among the employees. Inspections will be made once a week. In addition to this he asks for \$2,000 for two veterinary surgeons to inspect the sources of meat, and for \$2,000 for the inspection of meat, fish and bread requests \$6,000, in addition to the salaries of the two inspectors now employed. During the past year, the report points out, there were slaughtered at the Western Cattle Market 125,000 cattle; 194,200 sheep; 125,325 swine, and 29,474 calves. At the Union Stock Yards, West Toronto, the number of animals slaughtered was 165,586 cattle; 46,842 sheep; 47,461 swine, and 16,831 calves. Post-mortems were held on 1580 cattle, showing to some extent symptoms of disease. Of this number 32 were slaughtered under the abattoir under government inspection. The remaining 828 were slaughtered under the personal inspection of Dr. Saunders, city veterinarian.

There are in Toronto, Dr. Hastings points out, 22 private slaughter houses, in which are killed an average of 750 cattle per week, or 36,400 cattle per year. In addition to this there are 36,400 sheep, 25,000 hogs and 16,824 calves slaughtered annually. In the case of the cattle alone it was only possible to make 1894 post-mortems out of 36,400 slaughtered animals. Assuming that only one per cent. of the cattle slaughtered are diseased, enough to warrant their condemnation for food purposes, Dr. Hastings points out there must have been 360 carcasses used in Toronto last year which should have been condemned.

A Briton, wherever he may be, whether he is of the old country, or whether he is a habitant of the dominions over the seas, is ever ready to admit pluck, and the enterprise of Dr. Hastings, in inaugurating the great idea of a world's tour of the finest body of choristers ever brought together, is bound to meet with the admiration and approval of those who have the great cause of musical advancement at heart. The credit for the inception of the idea is due solely to Dr. Hastings, but without the cordial co-operation of Dr. Henry Coward and the members of the Sheffield Choir, the successful carrying out of so great an enterprise would have been well-nigh impossible. When all the factors are equal, when all are equally determined on the success of the undertaking, there can be no doubt as to the eventual successful result. Music in itself has an elevating and at the same time a levelling effect, but levelling itself to the ground, the alone will prove that the great task which Dr. Hastings has undertaken, will be of immense service to the various countries that are to be visited. The choir will be heard at Massey Hall April 4 and 5.

SHEFFIELD CHOIR'S WORLD TOUR

Central Conservative Association. The Central Conservative Association of ward six will hold their regular monthly meeting in Brockton Hall, corner of Dundas and Brook-ave, to-night. It has been arranged that two or three members from New Ontario will address this meeting and it is expected that they will show what effect reciprocity would have in this new part of Ontario, should the present reciprocity bill ever be carried into effect.

CHIEF HAD EASY SAILING

His Estimates Met No Opposition in the Fire and Light Committee.

The estimates of the fire and light departments calling for an expenditure of \$458,713.40 in the former, and \$164,281.45 in the latter, were taken up by the fire and light committee at a special meeting yesterday afternoon. The fire department's estimates were passed with scarcely any comment, except on the request for \$20,000 for auto chemical and hose wagons. Controller Spence questioned whether the motor propelled vehicles would be satisfactory in the unsurfaced streets during the winter months. On the chief explaining that the hose wagons would prove satisfactory, the committee passed with the rest of the fire department estimates.

The estimates for lighting were all referred back in order to give the secretary an opportunity of conferring with the city's hydro-electric department. The request for appropriations were based entirely on the present system of lighting.

Chief Thompson had a special request for an additional increase in the salaries of the firemen other than provided for in the city by-law governing increases in this department. The request will be considered at the regular meeting of the committee when the special sub-committee is expected to be ready to report on the increases.

KEEN FOR LOUISA-STREET LINE

Street Railway Asks Ontario Railway Board to Grant Power.

The Toronto Railway Company has applied to the Ontario Railway and Municipal Board for power to build the line on Louisa-st., their request for which has been before the civic works committee and the board of control for a couple of weeks. They also ask that the city be enjoined from interfering with the proposed extension. The city solicitor has asked the board of control for advice on the matter, and the request came up at yesterday's meeting. Action was deferred until to-morrow.

PREVENTION OF TUBERCULOSIS.

The Canadian Association for the Prevention of Tuberculosis will hold its eleventh annual meeting on Thursday and Friday, the 16th and 17th of May, in London, Ontario. It is hoped that a large number of the public will attend. It is especially hoped to interest certain air currents in which are contemplating active work in this movement by the opportunity these meetings will afford of visiting the Queen Alexandra Sanatorium at London.

WON'T RAISE RATES.

MONTREAL, March 8.—Local transportation officers in this city today gave emphatic denial to a rumor which had gained currency to the effect that the steamship companies would raise the Atlantic passage rate on the eastern trip, owing to the largely increased traffic which will result from the coronation festivities in June.

Sending Out Balloons.

The balloon division of the Dominion meteorological service at the Toronto Observatory is now in operation. Kites and balloons carrying self-registering thermometers and other meteorological instruments are being sent up to ascertain the air currents in the higher atmosphere. The last balloon sent up was on March 1st. In each case the finder is rewarded for the return of the high flier and its instrument.

True Bills Against Women.

True bills were returned by the grand jury in the case of Mira Ehrlich, for receiving a quantity of stolen brass, lead and iron from the Grand Trunk, and Beale Camplin, accused of stealing from the T. Eaton Co. two fasciometers, one silk tablecover, and one box of paste, and of receiving the articles.

H. D. Cotton Here.

H. D. Cotton, Boston, organizing secretary of the Monetary Exposition Company of New York, is spending a few days in the city in the interests of the work. He reports that The World in Ontario, should the present reciprocity bill ever be carried into effect.

READY FOR JUDGE'S PROBE

Waterworks Engineer, Confident of Victorious—Mr. Leslie's Statement.

Waterworks Engineer Fellowes moved from the Island to the city yesterday to prepare for the opening of the investigation of his department, which is set for Monday morning before Judge Winchester. He says he welcomes the enquiry, and that he is confident the conduct of his department will bear criticism and inspection. He expressed a wish that the waterworks engineer, Mr. Leslie, who made the declaration of his own department, and Contractor Leslie, will be given an opportunity to repeat the statement before the judge.

Contractor Leslie stated that Pike was discharged before he complained of being ill. He seemed to have no bump of location at all. Mr. Leslie declares, as when told to place the pipe of the pump in a certain spot, he was believed to have made a mistake, and another diver was sent down to make investigations. He discovered that Pike had placed the pipe at the opposite side of the intake from where he had been instructed to place it.

Nothing could be done towards repairing the break in the conduit yesterday because of the strong wind blowing and the amount of ice floating in the vicinity of where the work is to be done.

GERMANY WARNS VATICAN.

BERLIN, March 7.—In a speech before the Diet today, Chancellor Von Bethmann-Hollweg admonished the Curia that a persistence in the recent tendency to the issuance of decrees affecting Germany without previous consultation with the government would lead to retaliation.

The chancellor announced that the tendency to the issuance of decrees affecting Germany without previous consultation with the government would lead to retaliation. The chancellor announced that the tendency to the issuance of decrees affecting Germany without previous consultation with the government would lead to retaliation.

Teaching Appointments.

At the meeting of the management committee of the board of education today the following recommendations from the board of inspectors will be brought in:

The resignation of Miss A. A. Doner, teacher in Strathcona school, be accepted.

Miss E. Beatrice McCoy be transferred from St. Clair to Strathcona school.

Miss B. Redpath, now on the staff, be assigned to St. Clair school.

Request of the Queen-st. East Day Nursery for a kindergarten be granted.

Leave of absence from April 1 until the end of the term be granted Mrs. S. A. Spence, teacher in King Edward school.

Mrs. Florence Robinson be appointed to the Island school.

Missionary Meetings. The Young People's Missionary Movement have arranged for an inter-denominational last night in Winham for the surrounding district on March 16th and 21st.

The speakers will likely be: Rev. A. E. Armstrong, Rev. J. G. Brown, D.D., Rev. A. C. Farrell, B.A., and Rev. H. C. Priest will likely be the chief speakers.

Penny Bank Banquet.

The Penny Bank, the public schools savings institution, will hold their annual banquet in McCorky's to-morrow night. Representatives from Ottawa, London and several of the cities and towns of the province will be present, and many matters of interest will be brought up. According to Inspector Hughes, school children of Toronto have over \$100,000 deposited.

BOTH PARTIES WERE DESIROUS OF SECRECY

Reason Why British Manufacturers Were Not Consulted During Tariff Negotiations.

LONDON, March 8.—Every time reciprocity is mentioned in parliament there is a warm passage-at-arms. Mr. Balfour, leader of the opposition, and Sir Edward Grey, the foreign secretary, had a brush to-day in the house of commons over Ambassador Bryce. Mr. Balfour wanted to know what instructions had been sent to the ambassador, and why British manufacturers had not been consulted during the negotiations between the United States and Canada.

The tendency would be for the Americans to put pressure on Canada to raise the duties against the United Kingdom, said Mr. Balfour. The only bright spot, he said, was Premier Laurier's reiterated wish for imperial preference. "The whole question is not dead in Canada and I can assure the government it is not dead here," he exclaimed warmly.

The foreign secretary replied that the government had not sent any instructions to Ambassador Bryce, and did not propose to do so.

A Deep-Dyed Mystery. Hearing of a certain mysterious unidentified personage received by a number of principals and teachers of the public schools recently, calling a meeting in King Edward school yesterday, Superintendent of Buildings Bishop stated that no application had been made for the use of the school and it was closed up at 4.15. The meeting was called for the hour the meeting was called for.

The Stomach Needs Help

The Liver, Kidneys and Bowels Must Be Kept Active to Ensure Health.

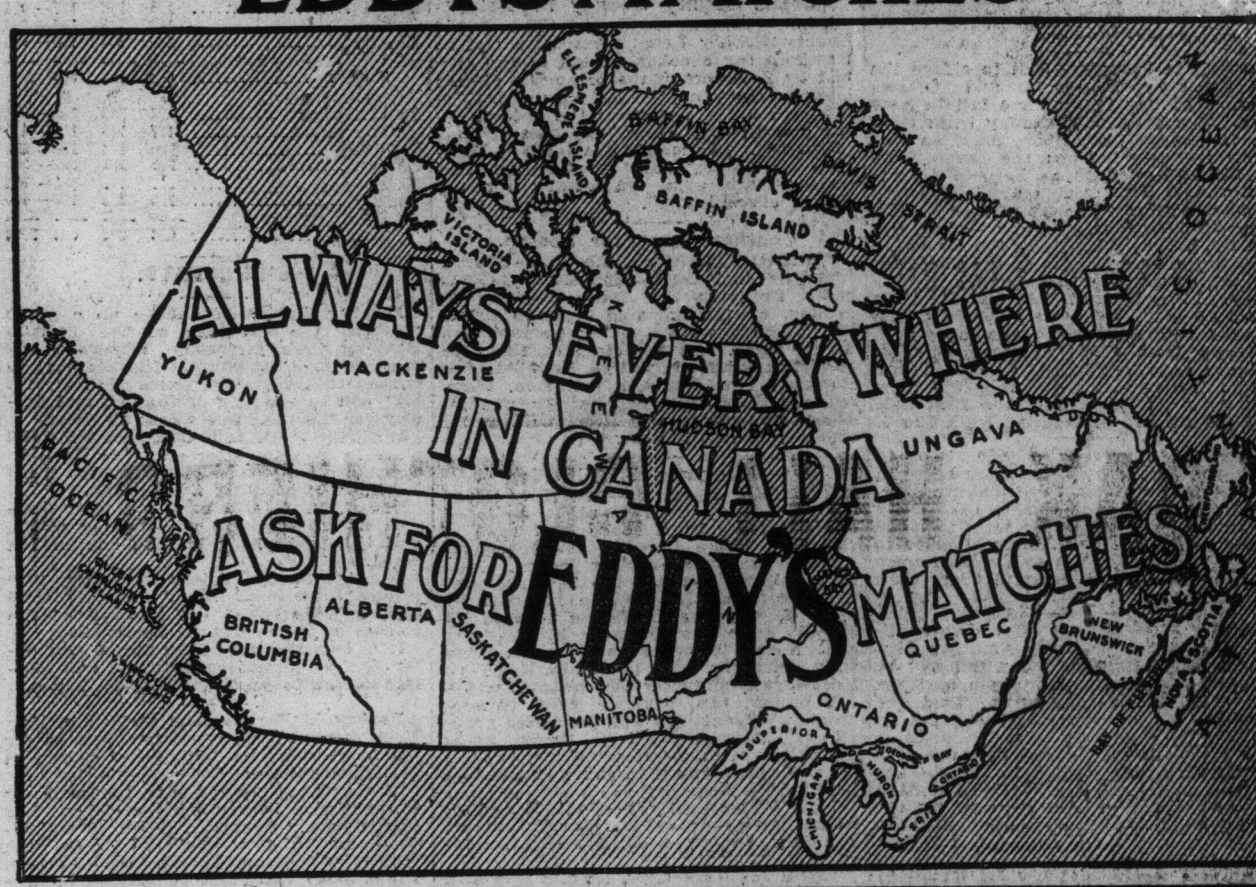

DR. CHASE'S Kidney-Liver Pills

Not one person in a hundred can get along at this time of year without using something to enliven the action of the liver, kidney and bowels.

Too much eating of heavy artificial foods, too little outdoor exercise, this is the explanation. The liver and kidneys are over-stressed in their efforts to remove the poisonous waste matter from the system. They fail and become torpid and clogged. The bowels, which are kept at once and by awakening the liver and kidneys ensures the thorough cleansing of the filtering and excretory systems.

With the poisonous obstructions removed, the digestive system resumes its healthful condition, appetite improves, pains and aches disappear as well as irritability and depression. You cannot imagine a more satisfactory treatment for biliousness, constipation, backache and kidney disease than Dr. Chase's Kidney-Liver Pills. One pill a dose, 25 cents a box, at all druggists, or Edmundson, Bates & Co., Toronto.

EDDY'S MATCHES

HEAVY INFANT MORTALITY

Dr. MacMurchy Makes Startling Report on Conditions in Toronto.

Dr. Helen MacMurchy, in a special report made to the government on infant mortality in this province, points out that in Ontario in 1900 births 125 die before they reach the age of one year. The rate in England is 109 per thousand births and in New South Wales only 72 per thousand.

"The time has come to act," she declares. "We cannot give every child a certified milk, but we must see to it that the poor man's milk is good enough for him to keep his baby alive."

"In Toronto," Dr. MacMurchy says, "there are houses as bad as existed in Scotland in the 18th century." Dr. MacMurchy quotes Dr. News-ome, chief medical health officer of the London County Council, to the effect that infant mortality is highest where under urban conditions of life, filthy privies are permitted, where scavenging is neglected and where the streets and yards are to a large extent unpaved.

The remedies Dr. MacMurchy suggests are stricter municipal regulations as to cleanliness, the registration of all births and the education of the mother. Also a system of licensing midwives.

WILL NOT SELL CHURCH.

MONTREAL, March 8.—St. James' Methodist Church property will not be sold, notwithstanding the reports or tempting offers. At a meeting of the joint boards of the church, it was unanimously decided that although they could dispose of the present property at a figure that would enable them to build a suitable church elsewhere, the most aggressive work could be done in their present building. It is said that an informal letter mentioned tentatively \$150,000 as a basic price.

Women's Historical Society. The monthly meeting of the Women's Canadian Historical Society will be held to-day at 3 p.m. in the Canadian Institute. Papers will be read by Miss Richardson and Miss Chaucery Toote.

A Literary Wedding. NEW YORK, March 8.—Seumas MacManus, writer of Irish folklore stories, will be married to Miss Caroline Paez, writer of children's books, in this city to-morrow. Miss Paez is a granddaughter of John Paez, who was the first president of Venezuela.

CAN'T EXPROPRIATE LAND

City's Request for Wider Powers Gets Setback at Queen's Park.

The municipal committee yesterday declined to accept Toronto's proposal giving cities of 100,000 inhabitants the right to expropriate land within 200 feet of the limit of any proposed road and to hold the land to sell it later at a profit.

H. L. Drayton for the city said the object in expropriating the land and selling it later was to help to pay for the local improvements.

The clause was referred to the private bills committee.

Toronto's request that the city have power to allow the city engineer to add to the cost of the maintenance to all tenders for pavements or sidewalks when tendering in competition with contractors was also voted down.

OTTAWA MAN APPOINTED.

Sir James Whitney announced yesterday afternoon that William Pratt, barrister, Ottawa, had been appointed deputy clerk of the crown, clerk of the county court and registrar of the surrogate court of Carleton County, in succession to John B. Featherston, resigned.

ALLOWED ANOTHER YEAR.

A year's extension was granted yesterday by the railway committee of the legislature to the Toronto Suburban Railway Company, but its request to increase its capital from \$1,000,000 to \$2,000,000 was struck out.

Handled Conductor Roughly. C. H. Waters was charged with assaulting a conductor when he appeared before Magistrate Kingsford yesterday. It appears that when out with a party, including his wife and four other people, he by mistake paid his fare twice. He was incensed, when the conductor, Charles Nodder, said he shouldn't have been such a fool, and grabbed the man by the throat in a temper. The case was dismissed.

Local Option Bylaws Upheld.

The court of appeal handed down some local option decisions yesterday, by which the bylaws in Alliston and Renfrew were upheld. Further leave of appeal was refused, as two previous attempts have failed in the divisional courts and before Justice Riddell.

BELL TELEPHONE CHARGES.

MONTREAL, March 8.—The question of the Bell Telephone Company's charge of \$5 for the improved telephone instrument and the matter of telephone rates and tolls will be gone into before the railway commissioners at their meeting to be held in Montreal in April next.

Crown Attorney Arohaubault returned from Ottawa to-day and stated that the legal counsel of the Bell Telephone Company had asked the railway commissioners for a delay of one week, which had been granted, and that this left the time so short that it would be impossible for him to prepare his reply to the company's plea for the meeting on the 21st inst. at Ottawa.

Her Face and Body Were Littered Covered With "BOILS."

Burdock Blood Bitters Cured Them.

Mrs. John H. King, Johnston, N.B., writes: "Last summer I was very much troubled with boils, and my face and body were literally covered with them. A friend advised me to take Burdock Blood Bitters. I got three bottles, and before I had taken all the first one my boils began to go away. I had just taken a few doses out of the last one when they all disappeared. My husband has also used Burdock Blood Bitters with much benefit."

Boils in themselves are not a dangerous trouble, but still, at the same time, are very painful. They are caused entirely by bad blood, and to get rid of them it is necessary to put the blood in good condition, and for this purpose there is nothing to equal that old and tried remedy, Burdock Blood Bitters. Manufactured only by The T. Millman Co., Limited, Toronto, Ont.
