### AFTER THE BATTLE.

One of the lessons of the plebiscite is that prohibition can only be carried in this country by a prohibition party and by that party getting a substantial majority from the electorate. It is idle to talk of the Conservative party or the Liberal party passing a prohibition law, without that party having first obtained a declaration from the people endorsing them as prohibitionists; but as yet prohibition is in the platform of neither the Conservative party nor the Liberal party, though the latter was committed to the plebiscite. And when it comes to this straight issue and prohibition is submitted to the people by a party committed to it, then the people will speak out in no uncertain way. In the vote on Thursday, the Province of Quebec declared against it and the cities and towns declared against it, and it is the height of absurdity for a dominant political party to talk of prohibition, when it knows that if it attempted to pass such a law it will have the cities and towns of the country arrayed against it, as well as the Province of Quebec. Such a party, as we said yesterday, could not live for a day. If the prohibitionists could start a party with that object in view, and if they could carry the country, they might be able to pass the law, provided always they could induce the Senate to vote away the liberties of the people. When one gets down to the hard facts of how laws are made and how the constitutional balance is preserved, one sees how ignorant Mr. Spence and his associates are in matters of Government, and how futile their talkings and their shoutings are. The easiest way out of the difficulty now created is for the politicians of both sides to challenge the prohibitionists to a straight issue, and we advise any Liberal or any Conservative who is bent on prohibition to come out of the ranks where he now is and stake his chances on his favorite plank. The politician who remains in his party and uses prohibition as a question out of which to make capital against his rivals is as dangerous as a mad dog and ought not to be tolerated. The prohibitionists, if they are really in earnest, ought to make a new party, make their platform declaration and go to the people.

When prohibition was purely an academic issue, as it was in the Province of Ontario some time ago, the prohibitionists piled up quite a majority vote; but on Thursday, when it became a closer issue and one wearing a political complexion, it had a very largely reduced majority in this province. And when it comes to be a real substantial issue, brought up by a prohibition party, with prohibitionists arrayed on one side and the anti-prohibitionists on the other, and also when it comes to be a question as to whether the future of the country is to be trusted to a prohibitionist party, then the people will rise in their might and smite the "faddists."

The people of the Maritime Provinces have declared by the plebiscite that they are in favor of prohibition. Having so declared, the people of Ontario have no objection to their realizing it in any way available to them, and that to our mind is to put in force a more stringent license law than they have now. They can practically tax the liquor trade to death, they can devote their money, as much of it as they like, to strictly enforcing a severe license law, and they can punish men who drink and neglect their families by imprisonment. They can pass a law that no one shall be entitled to municipal or provincial employment who takes liquor, and in a hundred ways they can realize their views by local and municipal laws and personal determination. They are isolated from the rest of the community and they will be able to practise for the edification of the whole world a system of local option, of high license law and of punishment for those of drinking habits. As we said yesterday, however, we are of the opinion that our Maritime friends are very much like our Highland ancestry, who preferred their whiskey smuggled to whiskey which paid a duty to the King. The one federal law that has been considered in the light of prohibition by our Maritime friends has been the excise and customs duties on the manufacture and importation of spirits. Sir John Macdonald was a clever man, but when he attempted to govern Nova Scotia from Ottawa he had for years to wink at a relaxation of these laws. A great deal of smuggling is going on every day in the Maritime Provinces, where the people seem to have a strong and steady taste for Scotch whiskey, which comes into the country via the French islands in preference to that which comes in straight through the customs gate. If, however, we are doing our Maritime friends an injustice by saying they prefer the smuggled article, then they are at liberty, as we have already set out, to vindicate their superior virtue in the matter of drinking and to set an example to all the world in the matter of provincial, municipal and social laws, based on their strong temperance feeling, and thereby set an example to the rest of the provinces.

We do like to see people live up to their professions, and having professed so much the people of Nova Scotia and New Brunswick have now a chance to practise. There is more hypocrisy in this question in Nova Scotia than in any other province.

## VICTORIAN NURSES IN KLONDIKE.

As Described in a Private Letter From Col. Evans, Commander of Yukon Force, to Countess of Aberdeen.

The following letter, dated Fort Selkirk, Sept. 1, from Col. Evans to the Countess of Aberdeen, will be found interesting.

Dear Lady Aberdeen—On Tuesday at noon I returned from Dawson, after a two-and-a-half-day's trip—180 miles—against the wind, and in a very bad state of health. On returning here I was greeted with the dismal information that the Anglians, or rather the "Tahli" Indians, had been wrecked on the Hootallians, whose waters are now too low to permit of steamboat navigation. The force, including Nurses Hanna and Payson, and Miss Fenton, will thus be compelled to travel 400 miles in scows.

I saw Miss Powell at Dawson. She decided to remain there as soon as she visited the place and found how great was the need. She would have liked to have Nurse Scott with her, but the latter could not be spared from Fort Selkirk at present. I hope the other nurses may arrive before the end of the season.

Miss Powell is in full charge of the Good Samaritan Hospital—Presbyterian—and is working out of her feet. This hospital, although not yet completed, is a very comfortable building, nearly all typhoid cases, the hospital consists of two log buildings, about 28 feet long and 10 feet wide, and is built on a bog, ill-drained and difficult to drain. She herself lives in a small tent, and as it freezes now every night, it is poor quarters for her after her day of severe and trying work. I hope they will have a cabin built before the other nurses arrive, but the hospital is at present rather hard up.

**House-to-House Nursing.**  
To see and be in Dawson is to realize that house-to-house, or tent, nursing is out of the question, and but for the hospital authorities I cannot imagine where the nurses would find a home. It costs a great deal to build a cabin. Logs are worth \$10 each, and wages run from \$10 to \$15 per day. The police barracks are very small, poor shanties, and are not large enough for the detachment there.

**The Sights of Dawson.**  
Dawson is the sight of a lifetime, being built chiefly on a low, boggy flat, and on the sides and nearly up to the top of a high mountain. The main street is along the river front, and is very dusty, with its occasional mud hole. It is lined with shops, store houses, and last, but not least, saloons, hotels and gambling houses. The street is a very narrow one, and the houses are very close together. The street is a very narrow one, and the houses are very close together. The street is a very narrow one, and the houses are very close together.

**Nobody's Business.**  
It seems to be nobody's business to look after the sanitary arrangements of the town, which has grown in a year from 500 to 20,000 people, one of the greatest mining camps the world has ever seen. It is an impressive sight coming in on the boat, this city of tents and cabins, covering the long stretch of bog and flats, and clinging up the mountain side. Typhoid prevails in the town, and a worse epidemic may break out, and the smalls are avoided. Wages are very high, but there are thousands of idle men, who have food, and are not particular whether they work or not.

**Found Some Strawberries.**  
To-day, near camp, I picked up a large bunch of ripe strawberries, of good size and flavor. My men in their spare time pick vast quantities of cranberries, and if we could get an occasional turkey, all would be well. My barefooted buildings are in grand shape, and most of them will be fit to live in by the end of this week.

**Surprising Prices.**  
The prices in Dawson are surprising. A glass of lemonade 50c, a cucumber \$1, slice of watermelon \$1.50, porterhouse steak \$2.50, a chicken \$10, eggs (doubtful) \$2.50 a dozen.

### A Great Work.

The work of the Victorian Order in Dawson is a great one, and the opening of the new hospital was a very important event. The presence with the force has been valuable, as, scattered as it has been for the past three months, the distance of nearly 600 miles, I do not know how we should have fared without them.

Here, Nurse Scott's work, and not only that, but the work of the entire force, is a great one, and the opening of the new hospital was a very important event. The presence with the force has been valuable, as, scattered as it has been for the past three months, the distance of nearly 600 miles, I do not know how we should have fared without them.

**Warm Appreciation.**  
I trust this letter will reach Your Excellency in time to enable you to convey to the Countess of Aberdeen the sincere appreciation which myself and all ranks of the Yukon Force feel in regard to services rendered us by the nurses of the order at Dawson.

**HANGED HIMSELF TO A TREE.**  
John Hann, a Doon Resident, Takes His Life.

Doon, Ont., Sept. 30.—(Special.)—Mr. John Hann, 57, an aged and respected citizen of the village, was found here last night hanging to a tree in Aaron Good's bush, near the village.

As far as can be learned the particulars are these: Mr. Hann left home in the morning to take his cows to pasture, which was his regular duty. In taking them he called on his daughter, Mrs. A. Weaver, leaving some milk and saying to her that he was going over to the pinnace. She noticed a rope in his hand, but thought nothing of it as he was hauling corn the day before with the same rope. He left but did not return to dinner and supper time came, but he did not return home. After supper a searching party was instituted, with the result as above stated.

Deceased was an Englishman, having come from Helston, England, about 10 years ago. The greatest sympathy is felt for the bereaved family. He was buried this afternoon in Doon Cemetery. He was 68 years of age.

**Central Y. M. C. A. Opens Season.**  
The opening reception of the Central Y. M. C. A., held in Association Hall last evening, was well attended, and a very pleasing program was provided. Mr. Frank Yeigh, vice-president of the Association, spoke of the advantages of the business training now provided by the association and the general efficiency of this year's staff. Mr. Thomas McGillivray set forth the benefits to be derived from the gymnasium. Mr. A. L. French of Boston entertained the proceedings of the evening with his excellent mimicry and whistling. The interior of the building has been thoroughly renovated and every facility provided for a prosperous winter's work. On the 12th inst. Mr. Yeigh will deliver a lecture and exhibit 100 Canadian views. Several prominent speakers have been engaged to deliver lectures during the winter.

**SPANIARDS DISCONTENTED.**  
Insurgents Allowed to Land Arms. Spanish Troops, Not Permitted—Reforms Granted.

Madrid, Sept. 30.—The Cabinet has decided to authorize General Rios to grant to the Spanish troops the reforms demanded by the inhabitants, and to concentrate his forces at Mindanao, as there are only 400 men garrisoning the Vizayas. The Spanish Ministers also decided to protest to the Government at Washington against the refusal of the Americans to permit Spanish troops to be sent to the Philippines, while it is claimed, the insurgents are constantly receiving arms and cash with which to attack the other islands, and to pretend to intervene.

The Spanish Cabinet, it is added, will re-open its protests against the insurgents continuing to hold Spanish prisoners in the Philippines Islands. The Government here estimates that there are 20,000 people in Porto Rico who desire to return to Spain.
