on his system. It means cool cars in

without chills in winter, and it means no dust.

Economy means that the citizens pay for what they get, without contributing a million dollars or more a year to a corporation for the permission to use their own property. It means that instead of paying dividends to a corporation the profits would be applied to reducing the fares. This would mean a three-cent fare eventually, and better value for the present fares than can now be had.

safeguards than legal ones.

# reached?

As The World pointed out on Saturday Controller Hocken's idea is to tap the districts of the Newer Toronto lying outside the limits covered by the franchise of 1891.

The Street Rallway Co. has refused to extend its lines into this territory. The law lords of England have de- on one side of the political line, passed clared this territory to be outside the away. company's control.

to the old city limits, where emergsing into daylight it may become a The bolder policy has again proved surface system uniting with the var- itself the stronger and none can deny ious feeders in the new territory. This that the quality of the budget has wonnew territory containing over 5000 derfully heartened the rank and file acres is tilling up at an unprecedented of the ministerialists and particularly rate and unlike the city proper every the requirement that undeveloped resident will be a street car passen- urban sites, and what is called the ger. The present street car system, "unearned increment," shall in future fendant. The plaintiff, a miner holding on, without the passenger traffic from Tentative as is this part of the budget, the outside, will be merely the core of it is the thin edge of the wedge which

want the core. They want the whole gravity of the principles involved.

eastward lines from Transpood-avenue on Gerrard and Dantorn with a gridfrom in North Toronto, and west on Clair, avenue, and with the motwork which will be required in the West Toronto territory as far as the Humber, the city will have the street. railway situation in the hollow of its

Meanwhile the Street Railway Co. sims at the occupation of as many streets as will block the city in any future effort to make central connecurban streets and roads as far as possible. To guard against this as much as anything else is the strongest argument for the annexation of circum-

jacent city territory. With a tube system operated by the city in conjuction with suburban gurface lines the city can meet the approach of Sept. 1, 1921, with equanimity. The city can do that under no other conditions.

ELECTRIC FREIGHT HANDLING. It has been calculat 1 in England that the average railway truck, or freight car as we would say, costs 180 to build and that there are 750,000 of them, representing a capital of \$300,000,000.

The average annual work that is got out of these trucks is 14 days each, or one hour in the 24. The cause of the primitive methods of loading and unloading. Instead of earning dividends, the trucks lie on sidings 351 days a year. As a result freight rates are higher than in any European country, being three times as high as in Russia and nearly double the German rates. It is suggested that a central freight | South Africa.

depot be established in London. This would save to begin with \$200,000,000

By the aid of electric controllers the entire railway freight of London could Nobody can yet estimate all the ad- be easily and quickly hanged in a Wonderful Growth in Sales central clearing house of 406 feet wide
