TOMMY NEEDS THE SMOKES!
Contributions taken by the Postmaster of St. John for Overseas Tobacco Fund.

To the Editor of The Times:
Sir:—Having received from Overseas Amalgamated Tobacco Funds of Montreal (P. Q.), their Collecting Fund Card, I would earnestly appeal to our citizens for their contributions towards maintaining successfully the mission it represents.
I may here quote the following information contained in the appeal, and state the Postmaster will gladly receive all contributions, and as each card is filled will forward the same with the amount collected to headquarters, Montreal.
(1st) Every cent contributed goes to purchase tobacco and cigarettes.
(2nd) By arrangement with the British and French governments the tobacco is packed in bond and shipped duty free. This enables the Overseas Club to secure tobacco and cigarettes at the lowest possible price.
(3rd) For one quarter (50c) the Overseas Club are able to supply: 50 cigarettes, 4 oz. smoking mixture, a box of matches and a postcard. For \$1.00 the Overseas Club can supply: 50 cigarettes, 4 oz. smoking tobacco, 1 briar pipe, 1 tinder lighter, 1 rubber lined pouch, some matches and a postcard.
EDWARD SEARS.

PRAYERS BY MACHINERY.

Wheel of Ladaki Buddhists Not to be Stopped by Shutting Off of Water Power.

Driven by a small stream of water, a certain water wheel serves to turn the rice mill of a tiny Ladaki village in the foothills of the Himalayas behind Simla, the summer capital of India. The Ladakis belong to the Lamaistic or Tibetan branch of Buddhism, a unique feature of whose worship is the use of the prayer wheel.

Some of these wheels—filled with written prayers, usually countless repetitions of the sacred text, "Om Mani Padme Om"—are revolved in the hand, others by the wind, and still others by water, each revolution of a wheel being considered equal to one repetition of all the prayers it contains. This particular wheel is of the water driven type, several thousand prayers being carried in the hollowed-out wooden shaft, and turned while the grinding of the rice proceeds.

Prayer wheels of all descriptions are

by no means uncommon among the Himalayan Buddhists, and there would be nothing especially remarkable about this one but for the fact that, in conserving the flow of a mountain river in connection with the hydro-electric project that is shortly to furnish light and power for Simla, it appears likely that the flow of a number of little streams which are driven on for water to drive the rice and prayer wheels of several small villages will be, for a part of the year at least, entirely cut off.

The government of India, therefore, ever scrupulously careful to avoid interfering with religious practices, has decreed that where the owners of water wheels whose power will be interfered with by the Simla project do not elect to accept a money compensation for their loss a motor shall be installed for them and power furnished free of charge. So it would appear likely that the wheel in question, in sending up the first electrically driven prayers to Buddha in Nirvana, will accomplish a feat that will make the latest wonders of the wireless pale into insignificance by comparison.

The Doctor's Family

It is part of the Doctor's duty more than for most professional men, to keep up appearances. His family enjoys a high standard of living—extra comforts and good living become a habit with them.

If anything happens the doctor—and there are dangers in the medical profession—how will his family meet the change in their mode of living? Luxuries have become necessities to them. The loss of even these will to some extent mean hardship. The sum of money left out of the doctor's savings may prove inadequate.

A Guaranteed Monthly Income policy forms the best possible method of dealing with this question. This most desirable form of policy will provide regular continued payments during the entire life of the beneficiary. It is issued by the

Electric Flashlights are no longer a novelty, but a thoroughly practical and satisfactory medium for obtaining a quick, strong, safe light—useful in a thousand and one emergencies.

The O. K. Electric Lantern

The Lantern that is rapidly displacing undesirable oil lanterns and lamps, as it is absolutely safe around gas, gasoline, oil or hay.

It is clean and convenient—no smell, heat or smoke; no fire risk; no danger of explosion. Ready for instant use anywhere and absolutely reliable where an oil lantern would be valueless.

The O. K. Lantern has no projecting parts, the handles press against the sides, permitting it to be carried in the pocket. Uses any ordinary No. 6 dry cell battery and gives from six months' to one year's service from one battery at a cost of 35c.

Sizes 9 inches, 2 7/8 inches diameter.

Pressed Steel, Black Rubber Finish, complete with Battery, Each.....\$2.25

"Presto" Electric Hand Lamp

This is a class safety lantern that uses any No. 6 dry cell battery, which can be easily obtained anywhere, and with ordinary use will give you service for several months.

It is equipped with bull's eye lens which greatly increases the candle power and projects a strong, white beam of light. The pivoted construction of the reflector permits it to be turned to any angle directing the light upon any desired object.

Made of Steel, finished in black enamel, with Nickel Plated Lamp Head.
No. H008—With 3-inch lens, complete with battery, Each.....\$2.75
No. H020—With 2-inch lens, complete with battery, Each.....\$2.25

The Bonny Blink Electric Lantern

This Lantern takes any standard No. 6 dry cell battery, the same as the O. K. It is made on the same principle and has the same such, the difference being in that the reflector is on the side and there is a top ball for convenient carrying and a side handle for snuggling into dark corners.

Size, 7 1/2 inches high, 8 inches diameter.
Pressed Steel, Black Enamel Finish, Complete with Battery, Each.....\$3.75

The Meteor Electric Lantern

This Lantern is designed to attach direct to any ordinary No. 6 dry cell battery, no case being required. It takes up very little room and is easily and quickly attached to binding posts of battery.

With Battery.....Each \$1.25
Without Battery.....Each .75

Dry Batteries

No. 6 Columbia Ignitor, 1 1/2 volts a high grade dry cell.

Each.....35c.

No. 86 Xcell "Lighter", 3 volts. Standard size, but double strength.

Each.....40c.
