

## THE STANDARD'S FINANCIAL SECTION

Canadian Cottons  
Report Most  
SatisfactoryProspects for the Year Are  
Bright and Good Business  
Is Expected.

## Special to The Standard.

Montreal, Oct. 11.—In circles close to the Canadian Cottons, Limited, the statement is made that the business of the company was never more satisfactory, perhaps, than it is at the present time.

A year ago it looked as though good times were entirely behind and preparations were being made to face not only a falling off in demand, but cancellations of orders and decline in price, which could only be met by a stiff write-off, as appeared later in the financial report of the different cotton companies. This write-off was one of the most troublesome factors on the year's business.

The situation today shows almost a complete reversal as compared with a year ago. Owing to the constant decline in cotton in the early part of the present year, prices of the products of the various mills tended downward until the low point was reached a few months ago. Canadian Cottons, along with the other mills, has lately been making prices up again, this being in harmony with and proportionate to the advance in the price of the raw product.

The past year has brought out a somewhat fortunate development, so far as Canadian cottons are concerned. This consisted of the return to popularity of gingham dresses. Not only for home but for street wear. Such was the demand for these during the past season that it was next thing to impossible to supply it. The prospects for next year are quite as good as for the past and Canadian Cottons is profiting thereby.

The company has concentrated at its plant at Milltown, N. B., the manufacture of gingham and is working over time to supply material for next season. After many years of effort and experience, the company's product has reached a degree of perfection with respect to design, fineness of color and finish of material, which is causing much satisfaction throughout the trade and in consequence thereof the entire output of the mill is required for next season.

In other lines, such as damms, cotton twines, etc., such as used in men's wear, the demand is not quite so insistent, but is nevertheless satisfactory. Mills operating on these goods, even if not 100 per cent. employed, are at least busily employed, thus showing a marked improvement over the situation a few months ago.

Since the signing of the present calendar year, many labor problems have been met and satisfactorily disposed of. The supply of labor is now adequate and the difficulties of the past few years are no longer present.
