

# NOVA SCOTIA.

**Coal, Iron, Gold, Copper, Lead, Antimony, Talc,  
Barytes, Gypsum, Mica, Plumbago,  
Zinc, Asbestos, Etc.**

THE partial mineral development already effected in this Province reaches an annual turnout of nearly FOUR MILLIONS OF DOLLARS, and large tracts of Coal, Iron and Gold bearing lands are yet unoccupied.

Nova Scotia, from its mineral wealth, climate and position, is destined to be the leading manufacturing State on the Atlantic Coast. The Iron Ores are being utilized for Steel.

The Coals furnish excellent Coke. The Gold fields are over THREE THOUSAND square miles in extent, and have hitherto received little attention.

The ores of Iron, Copper, Lead, Silver Gold, Tin and Coal are held by the Crown, and are granted on easy terms, on long leases from forty to eighty years. The other minerals are granted in fee with the land at nominal rates.
