## FROST EVIDENCE

In the first place, running wires are coiled. That means plenty of "give" with weather changes and strains. All wires are galvanized. That means no rust. Running wires are high carbon, hard steel No. 9 that bear 2,000 pounds pressure. Ordinary soft No. 9 wire snap at 1,200 pounds pressure. FROST LOCKS are non-porous Bessemer steel, galvanized or enamelled—rustproof and stronger even than the wire. FROST LOCK LOCKS both running and upright wires—holds them fast without crimping or bending.

## Frost Wire Fences

are just as trim and trig after being buried under the snow all winter as they were when put up in the spring.  
Write for a copy of our booklet. It tells the details about Frost Fences, and gives illustrations of fences actually in place on Canadian farms. FREE to YOU.

### Record Price for a Yearling Bull

At the recent sale of Shorthorn bulls at Perth, Scotland, Mr. Fred Miller, of Birkenhead, England, bought for the South American market Lord Lovat's prize youngster, "Broadhooks Champion," for the record price of \$7,875. The average price of the young bulls was near \$420. The entire 314 animals offered averaged \$370 each, or \$170 per head more than the average of last year's sale.

### Royal Agricultural Shows

The shows of the Royal Horticultural Society of London, England, will be held this year on March 22-34, June 6 and 7 and December 4-5. The one of special interest to Canada is the last one to be held in December.
