FIELD CROPS IN ONTARIO

will be a good average crop in Ontario this season if present indications hold good. Spring grains started splendidly and are making a good growth. Corn also is doing well. Some failures to get a catch of mangels are attributed by Farm catch of mangels are attributed by Farm and Dairy's correspondents to poor seed. The wheat crop, where not winter-killed, will be somewhat short in the straw but the yield it is expected will be fully up to the average.

the average.

The dry weather in the early part of the season has reduced the hay crop ruly one half although Mr. W. H. Mont-gomery of Leeds Co. says that "hay, especially elover, is bound to be a bumper crop." That this optimistic report does not apply to other part: of the province is proven by numerous correspondents who report hay as not more than half as crop. The control of the province is not section.

The province of the province is the province of the province is proven by numerous correspondents who report hay as not more than half as crop. This is particularly times sections where silos are now commonly in use and the corn crop is regarded as a necessity.

Alfalfa is creating much interest in all

a necessity.

Alfalfa is creating much interest in all sections, but the acreage sown will not sections, but the acreage sown will not sellow as great increase over last year as most farmers are merely experimenting most farmers are correctly only as a constant of the section of the section of the section of the section that the acreage seeded to receive on popular and so largely grown in his section that the acreage seeded to red clover, timothy and aliake is decreased constant of the section of section of the section of section of

CLOVER AND ALFALFA INCREASE "The acreage seeded to grains remains the same as in 1910. Clover and alfalfa are on the increase. Spring grains look well. Hay is bound to be a bumper crop." — W. H. Montgomery, Leeds Co.,

There has been an increased acreage

seeded to corn; alfalfa is not grown. George A. Smith, Frontenac Co.

"The hay crop will be short this season, pring grain looks well but needs rain."— W. Thompson, Hastings Co., Ont. AN INCREASE IN CORN

AN INCIEASE IN CORN

"Spring crops are excellent. The hay crop will not be heav. There is about the usual acreage in corn." - Thos. Hoskin, Northumberland Co., Ont.

"The acreage devoted to various crops to the same as last year with the exception of the corner of the crops is better than last year." - Wm. ketth. 10rk Co., Ont.

Ont.
"Hay will not be a heavy crop. Spring grains look well. Many report a slow germination of mangel and sugar beet seeds."—Subscriber, Waterloo Co. Ont.
DECIDED INCREASE IN ALFALFA

"About the usual acreage of roots

grains was seeded but there is quite an increase in corn and a decided increase in alfalfa. The acreage devoted to red elover, timothy and alsike is decreasing. Hay will be light. Wheat will be short will be shor

"Crops generally are better than for several years past. Alfalfa is the only erop to which a larger acreage than usual is devoted.—R. J. Watson, Dufferin Co., Ont

"All crops but hay are above the average."—A. A. Dewar, Lambton Co., Ont.
"The usual crops have been seeded this re usual crops have been second this spring with a general increase in acreage. Crops generally look good."—B. L. Phillips, Thunder Bay District.

HOW A WORLD'S CHAMPION WAS FED AND MANAGED.

In "The World To-Day," Horace B. Javies gives an account of how Missouri Chief Josephine, the world's record cow was cared for. He says in part:

"The box stall in which Josephine is
