**Why Don't You Use  
Amatite  
ROOFING?**  
It Needs No  
Painting!"

EVERYTHING about Amatite appeals to the man with common sense. He can see its superiority at once—the real mineral surface which never needs painting; the two layers of Pitch which is the only imperishable waterproofing known; the two layers of heavy Tarred Felt—all these contribute to the popularity of Amatite.

We can make Amatite better and cheaper than anyone else on account of our greater facilities, and consequently we sell it at a surprisingly low figure.

Simply the fact that it needs no painting is enough to make a man sit up and take notice—especially the man who has spent dollars and days in painting and repainting his smooth-surfaced roofings.

Write to-day for free sample and booklet to nearest office.

PLEASE MENTION THIS PAPER.

**The "Bissell" has wonderful capacity**

Test the "Bissell" In-Throw Harrow on your land, and you'll see what a harrow designed by a specialist will do. Our Mr. T. E. Bissell has been personally connected with the manufacture of disc harrows for nearly a quarter of a century, and is recognized as an authority on disc harrow construction.

The "Bissell" In-Throw stays right down to its work no matter how tough the land. It doesn't rock or sway. The plates stir the soil thoroughly. The gangs stay tight. There is no neck weight, therefore the horses do more work. It has wonderful capacity—wins every field competition.

The construction is simple, durable and trouble-proof. Send to Dept. W for booklet describing both our In-Throw and Out-Throw Harrows, and our 16 plate wide cut harrows, which are so popular in the Northwest. And remember that the name "Bissell" stamped in every genuine "Bissell" harrow.
