#### Cream Separator Buvers TAKE NOTICE

You know that the Babcock tester – used the world over for testing skimmed mirk—contains neither disks nor other contraptions. Since the Babcock tester does not need inside contraptions, it is plain that a properly built cream separator does not need them.

#### Sharples Dairy Tubular Cream Separators

are the only separators free from disks and other contraptions. The only simple—the only properly built separators. The World's Best, Produce twice the skimming force of

common separators and proved by the Babcock tester to skim twice as clean. The saving Tubu-lars thus make you is clear profit you cannot get any other way. Tubulars are guaranteed

Tubulars are guaranteed forever.

Waste notime with common, complicated separators. You will want a Tubular until you have one-so why not get it in the first place. The manufacture of Tubulars is one of Canada's leading industries. We made the first separators manufactured on this continent and have been at the business thirty years. Write for illustrated catalog No. 193 telling all about Tubulars.

Hence we are making this special Free Example of the price, while you are "sizing up" the shoes. If they fail to convince you immediately asking a deposit of the price, while you are "sizing up" the shoes. Overwhelmed by the World-Wide Demand you can notify us to send for them at our The success of Steel Shoes is almost startling. Within three year established Steel Shoe factories in Racine, Wis.: Toronto, Constitution of the Steel Shoe factories and factories, running at funcian scarcely keep up with the demand from all over the way public is rapidly learning that Steel Shoes are

expense and we will refund your money. Must Sell Themselves

We ask no favors for Steel Shoes. Compare them with the best all-leather work shoes you can find. Give them themostrizid inspection inside and out. Let them tell their own story. It's no sale unless, of your own accord, you decide that you must have them.

#### **Better Than the Best All-Leather Work Shoes**

Steel Shoes are the strongest and easiest working hoes made. nore good wear in one pair of Steel Shoes

There's more good wear in one pair of Steel Shoes than in three to six pairs of the best all-leather work shoes. The leather is waterproof. The Steel Soles are wear-proof and rust-resisting.

They are lighter than all-leather work shoes.

Need no breaking in. Comfortable from the first moment you put them on.

Impossible to get out of shape. They keep the feet dry. They retain their flexibility in spite of mud, slush or water. They cure corns and bumons, prevent colds and rheumatism—save doctors' bills and medicines.

#### Thousands of Farmers **Shout Their Praises**

Shout Their Praises

The enthusiasm of users known no bounds. People can't say enough for their comfort, economy, lightness and astonishing durability. The introduction of Steel Shoes in a neighborhood always arouses such interest that an avalenche of orders follows.

Here is the way Steel Shoes are made. The uppers are made out of one piece of special light, thin, springs, rust resisting Steel. Soles and heels are studded with adjustable Steel Rivets, which prevent the buttoms from we ring out. Kivets easily replaced when partly worn be extra rivets cost only 30 cents and should keep the shoes in good repair for at least two venrs! No other regains ever needed! The uppers are tightly joined to the steel by small rivets of rustresisting metal, so that no water can get between.

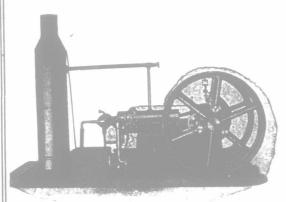

The soles are lined with soft, springs, comfortable Hair Cushions, which absorb perspiration and odors and add to ease of walking.
