

**These are -
Some of the**

PLOWS

**We Have Been -
Telling You About**

GOOD, strong, serviceable implements, every one of them, made of best materials and guaranteed to stand up against the hardest kind of service. These plows are designed so as to give the greatest turnover of soil with lightest draft. They represent the front rank of the Eaton implement line, and back of them we have cultivators, harrows, drills, land packers, haying tools; in fact almost everything you need from the time you first go on the ground in the Spring until your grain is bagged for shipment in the Fall.

The Eaton price results in a clear margin of saving to you. It means that the money which formerly went to the middleman now stays in your own pocket. The Eaton guarantee stands back of every implement we sell. It says that you must be satisfied before the deal

is complete. Any man who buys an Eaton plow, and has reason for dissatisfaction, needs only to say so, and his money and all freight charges will be refunded on return of the goods.

We keep telling you about this guarantee because it is your safeguard. It takes all the risk and all uncertainty out of Mail Order business, and places you in the same position as the man who sees what he is buying before he pays his money. Makes it just as safe and satisfactory for you to order a plow as to buy a jack-knife or a suit of clothes.

The Eaton Catalogue for Spring 1910 is now being circulated. It gives price and full description of all our goods. We want you to have a copy.

ROYAL CLIPPER Walking Plow

MOULDBOARD is high with gentle turn insuring light draft and excellent scouring qualities.

BOTTOMS strongly constructed and braced, with malleable frog. —

SHARES are of special processed steel, with beaded landsides and reinforced points.

BEAMS are extra strong, double ribbed forged steel, high curves to prevent

fouling from trash. **STOUT HANDLES** made of best quality oak.

The Royal Clipper, illustrated herewith, is a strongly constructed steel beam stubble plow presenting most desirable features. The plow is perfectly balanced, correctly proportioned, and braced so as to withstand the heaviest strain.

Prices are for plow, as shown above, with one share, for delivery from Winnipeg only.

This plow is an implement that justifies our strongest guarantee. It is built along lines that insure the greatest turnover of soil with lightest draft. **BOTTOMS** are extra high quality insuring long wear. **AUTOMATIC TRIPPING DEVICE** gives the operator complete control, attached. **SHARES** are interchangeable on all

BREAKER BOTTOMS can be supplied extra and are easily put on Walking, Gang and Sulky Plows.

Western Chief Sulky Plow

All operations are constantly under direct control of the driver. The levers which are within easy reach adjust the wheels and all other operations are a consequence of a light pressure of the foot. The plow enters and leaves the ground point first, locking automatically at the proper depth, or the locking device may be released so that the plow will float in the frame. Plow will turn square corners either way when in the ground.

What we are doing for the Grain Grower who lives in Saskatchewan and Alberta.

We realize that in selling heavy farm implements we can save our customers almost as much in freight charges as we can by eliminating middlemen's profits, and for the benefit of our customers who live far west of Winnipeg, we have arranged to ship certain heavy goods direct from the factory in carload lots at through freight rates to Saskatoon and Calgary. From these points they will be shipped to out-lying stations. This gives customers the benefit of through carload rates for the most of the journey from the factory, and a saving of several dollars in charges on each purchase may be effected as well as more prompt delivery being given.
