

BETTER AIR SERVICE

Better Air Service means more work accomplished by your drills and other air operated equipment, greater production and larger profit. **Better Air Service** comes only from a compressor of **Better** type. You can recognize one by its simple, strong and yet up-to-the-minute design—by the visible evidence of care and good workmanship in its building and most convincingly by the name it has made for itself among its users

CLASS "PLB-2" COMPRESSORS

Have always belonged to the better class. They are built to withstand the severest service and produce air at low cost with outstanding reliability. The following "PLB-2" features, as many Canadian Mining Men can testify, stand for the utmost satisfaction in an air compressor:

Noiselessness in Operation.
 Easy Accessibility of all Parts
 Automatic Lubrication at all
 Speeds.
 High Efficiency of Compression
 Low Cost of Operation & Repairs
 Simplicity and Compactness

Liberal Water Jacketing
 Large Intercooling Surfaces
 Dust Proof Frames and Casings
 Unusually large Wearing Surfaces
 Rigid Unit Construction
 Carefully Selected Materials
