The Directors Decide to Resume Work on the Brunswick.

Mr. Jay Benn, the mming man, recently visited the property of the Lardeau-Goldsmith Mining company known as the Brunswick, which is located 10 miles from Comaplix, in the Lardeau country. On Mr. Benn's return a few days since, he reported to the directors of the company that the upper tunnel was undoubtedly upon a large stringer of rich ore, which was obviously an offshoot of the main ledge. The ledge was to be found 200 vaids above on the hill. Mr. Benn rethe main lead, as he thought that this was the most likely place to find the ore bodies. The directors accepted the report and have agreed to subscribe for a suffi-cient number of shares to carry out the work as suggested by Mr. Benn at once done upon it to entitle it to a crown

THE OKANOGAN STRIKE.

The Vein Is Over 14 Feet Wide and Seam Assays \$107.

The assays from the new strike recently reported on the Okanogan Free Gold Mines were received in a letter from Sup-erintendent Edgecombe Monday, in which he says: "Since writing you re the which he says: "Since writing you re the western ledge I have been cutting through it and as yet have met no sign of a hanging wall, although the ledge is now 14 feet in width. In this ledge there is a very \$107 to the ton in gold. The ledge is composed of a series of seams, some of which asay low, while the rest will yield a pro-The ore is heavily charged with sul phurets, so that a very large amount of the values will be found in them."

A Consolidation of Companies.

At a meeting of the stockholders of the Lone Pine, Surprise and Pearl Mining companies, held in Spokane on Saturday, the sale of the properties of these com-panies by the trustees to the Lone Pine Surprise Consolidated Mining company, was ratified. This is one of the schemes of Patrick Clarke, Leo H. Long and

It is expected that a dividend will be from the money now in the treasury. new company will have a treasury fund of its own, so that the amount in the treasury of each company will be divided consolidation. These dividends probably will not be declared for some time yet, or not at least until the affairs of the com-

panies are finally wound up.

The Lone Pine stockholders will receive a share and one-half of stocks in the con-solidated company for each share of their

stock will get one and one-twentieth times their present holdings, while the Pearl as much stock as they have now.

The exchange of the new stock for the It was Ordered Yesterday for the St. There Has Been a Strong Market for old will be commenced some time this

Bonded Valuable Copper Propositions.

Dr. W. W. Deeks of Montreal, was at the Allan yesterday. He has bonded two rich copper properties on Copper mounthe Road-Work on the St. Elmo-Prospectian near Princeton. He has secured a working bond on the Helen Gardner and the Copper Farm mineral claims and has a number of men at work developing them. These are said to be two of the Work has been resumed on the Green best claims on Copper mountain, and although only a small amount of work has

isfactory showing of clean ore in the face.

An expert of the Standard Oil company has examined the Galena Farm property for that company, but nothing defi-nite will likely be done till the labor trou-

ble is setted. The ground sluicing on the Willard on Alpha mountain has exposed a fine body of clean ore similar to the Lone Star yein. The Bosun is shut down. On the day the men walked out 18 inches of solid ore was tapped in the No. 2 tunnel.

Seven men are at work on the Noonday taking out ore for another shipment The force on the Mountain Chief has been increased to 12 men, preparing the property for more extensive operations. which will begin shortly. This claim ha been lying idle some time owing to a falling out of the two owners, notwithstanding that a large amount of ore was in sight and ready for taking out. A bond has now been taken on the property by other parties and there is every likelihood of its proving one of the mainstays of New Den-

veved line for the Wakefield tramway, which it is expected will be commenced

at once. First nature interrupted the ore shipment by leaving the roads and trails in bad condition, and now the government with its eight-hour law has put a further stop to what promised to be a banner

The only lake shipments last week were from the Enterprise as follows: Twentytwo cars, containing 440 tons, to the Trail

Mining in Montreal.

W. H. Paul, who has recently returned rom a five weeks' visit to Canada's commercial metropolis, says that the interest in British Columbia mining properties shows no abatement. Beyond information and their respective values. Mr. Paul ing it over is stocked for \$750,000 in rousely there is sure to be a great tide of travel between Eastern Canada and the two sets of figures represent chiefly mining section of this province this sum-mer. Many persons whom he met de-to the Enterprise property, but the m to view the situation for themselves.

Dr. Deels left for Opper mounts the many of the phile of copper and that the water to the contract of the properties of the commence of the properties of the properties of the commence of the properties of the commence of the properties of the company of Canada. The second properties of the company of Canada.

The Vancouver mine was expected to be one that would continue work at the old rate, but last week the manager received orders to pay the miners off and only pay \$3.00 in future for the eight-hour shift, so that the men have all quit work.

Work has been temporarily stopped on the Neglected for a few days only. The tunnel is now in 80 feet, with a very satisfactory showing of clean ore in the face.

Ore from the discovery post workings, \$2 in gold per ton; ore from the workings at discovery post, where the vein is two feet in where the vein is two feet in where the vein is two feet in the demand for Brandon & Golden Crown, and yesterday there was a sale on the local exchange of 1,000 shares of the discovery post workings, \$22 per ton; ore from prospect shaft No. 1 on the same, a random sample, \$28 per ton; ore from prospect shaft No. 2 on the same vein, \$10.15. This shows that in addition to the workings on the main vein, which still maintains its excellent values, the Kenneth company has a further valuable asset. A late telegram says that the discovery post workings promise well and the assay result of the latest sample from the north drift in the main shaft is \$14 in gold. per ton. When it is considered that the ertain that these values will yield large returns after paying the mining and milling charges. Work is being vigorously pushed and there is plenty of money in

THE CLIFF MINE.

Machinery to Be Installed-Will Be Re-

Mr. Clarence Teasdale of Spokane, rep-Mr. Clarence Teasdale of Spokane, represting the Wharton interest in the Cliff mine, and who is the manager in charge of the property, arrived up from Spokane Tuesday afternoon. Mr. Teasdale is very busy making arrangements to push development work upon the mine.

Machinery is being arranged for, and the mine of the mine of the mine of the mine. luring next month the mine will be in full running order. It is expected that shipments will be resumed during July, shipments will be resumed during July, and as the mine had sent out over 1,000 tons at the time it was closed down, a year ago, it is more that probable that the weekly output from the Cliff, comencing next month, will be a substantial addition to the camp's tonnage. When seen yesterday Mr. Teasdale stated that he had no particulars to announce at pres ent beyond the fact that work would be started as soon as possible and that by July the Cliff would once more be found ongst the list of shippers.

Will Take Over the Enterprise.

A company has been formed in Lone take over the Enterprise mine on I shows no abatement. Beyond information regarding the leading mines of Southern British Columbia, the general public in fields. The Enterprise was purchase of the Enterprise of Southern by the London & British Columbia Go fields. me Remarkably High Assays Obtained from Ore from the Armstrong Group-Oganization of the Norway Mountain Mining Com-

visit to Ymir and Erie and reports that there is considerable activity at both these places. In the vicinity of Erie he reports that there are about 100 men at work. Mr. Parker visited a claim in which he is interested, which has the extension of the Arlington ledge and which he reports to be looking well. He also visited other properties and mines in that vicin-

eapolis; building of the hoisting plant is in prog-Foster, ress. In the Tamarac, work is progressing

Organization of the Norway Mountain Co.

The Norway Mountain Mining company has been organized by the election of the following officers: President, A. J. Littlejohn; vice-president, J. E. Sa resolution was adopted to the effect that 100,000 shares be sold for 5 cents. This will furnish the money necessary for development. The properties of the Norway Mountain company consist of four claims, which adjoin the E. R. property, which is under bond for \$50,000. The lead of the E. R. is traceable for a distance of 1,000 feet, and at a depth of 15 feet the ore assays \$40 to the ton. The E. R. abuts the of the Yukon.

The commission goes amply prepared for enjoying the junket. As the cutter is entirely at their service it is the next thing to a private yachting party. Whether the examination of the boundary matter can be efficiently done from on board the boat and in the rooms of the commercial clubs at each town is a question greatly. time after operations have been begun pay ore will be met.

this office there is an evident demand for a descriptive pamphlet giving the latest details of the progress of Trail Creek prop-But a United States senatorial junket no matter how important its object is never designed or expected to impose discomfort to any great degree on the members.

It is quite probable, therefore, that the commission will do a great deal of its inquiring on board the McCullough and that deputations of citizens will furnish the commission the gist of its information.

Of the members of the commission from the other side the most important is natinformation upon the public, but when it is largely sought for, a systematic effort should be organized to supply the want. This section is certain to have many hunpamphlet would do very good work for the community generally.

Anaconda Elects Officers

A meeting of the stockholders of the Anaconda Mining company was recently held, and the following directors were elected: J. R. Cranston, R. W. Northey, J. M. King, J. H. Robinson and E. N. Ouimette. The directors then met and elected the following officers: President, I. R. Cranston, wice president, P. W. J. R. Cranston; vice-president, R. W. Northey; secretary-treasurer, E. N. Oui-

The Mystery Tunnel.

Word came from Gladstone that the Mystery Mining company had encountered a good grade of ore a few days ago and still in ore. The tunnel is in over 125 feet. The shareholders are very much encour-
