TOLEDO

Mr John Judge, a highly respected citizen of this place, passed away on Monday last after a short but very painful illness. The funeral sermon was preached in the Roman Catholic church on Wednesday and a large crowd gathered to show their sympathy for the bereaved family. The pallbearers were Messrs, Frank Emmons, James Mitchell, Philip Yates, Martin Mercer, Thomas O'Grady and Michael O'Grady. Deceased was aged 71 years and was born and died at Toledo. He leaves to mourn his loss his wife and six children, one son and five daughters namely: James and Annie of Smith's Falls; Mrs. St. Louis and Mrs. Arnold of Montreal, Grace in Athens and Nellie at home.

A merry crowd assembled at the home of Miss Addie Bilamy on Tuesday night and for several hours had the greatest enjoyment. Games and music helped to pass the time very pleasantly, and about midnight a sumptuous repast was served, after which the crowd went at the fun again, the party not breaking up until away into the wee sma' hours.

Mr Palmer was recently visiting his cousin Mrs W.J. Seymour.

TETE JAUNE CACHE

The blast of the Grand Trunk Pacific Railway contractors is echoing against the rocky walls of Tete Jaune Cache to make way for civilization and the shrill echoes of the locomotive whistle later on.

Going westward from Edmonton along the Grand Trunk Pacific route the traveller sees the trail of the second com'r already strongly marked and Tete Jaune Cache is the objective point at present for the end of steel by the spring of 1912. At present the Grand Trunk Pacific steel is beyond the Great Divide and over the summit of the Yellowhead Pass.

Historically, Tete Jaune is a centre of interest in Western Canada, as this point was the site of one of the Hudson Bay posts one hundred years ago, when the route from the Pine, the Peace and the Fraser Rivers brought the furs and the merchandise through this gateway. At the present time there is only a band of Shuswap Indians camped on the South side of the Fraser, and as soon as the steel reaches this locality, civilization with its kodaks and pocket books will effect the establishment of a permanent order of things.

Concrete-mixing is Easily Learned

It is no more difficult than mixing bran mash, once the simple instructions have been read.

The materials—sand, crushed rock or gravel and cement—each play a separate part. The rock provides the bulk of volume at very low cost. The sand fills in all crevices between the pieces of rock or gravel. The cement, mixed with water, forms a "bond," in other words a rocky "glue," that binds the other materials firmly together.

with a strength that increases with time. Concrete is really artificial rock, more firmly bound together than natural rock, which often has cracks, veins, fissures and other weaknesses.

Any farmer can learn how to mix Concrete and to apply it to the hundreds of uses to which it is fitted.

But in order to be absolutely sure that his proportions are correct and that his materials are properly suited to the purpose, he should send for the book.

"WHAT THE FARMER CAN DO WITH CONCRETE," and read the careful directions for mixing Concrete for all purposes. It also describes in detail hundreds of ways in which Concrete may be used to make the farm more comfortable, more convenient, more profitable and more valuable.

Just send us your name and address—in a letter or on a postal card—and the book will be sent to you by return mail free. Address

Cause and Cure of Headache

The cause of headache as you know, is the stoppage of the circulation resulting in pressure on the delicate nerves of the head. In time nature will start the blood going again, but meanwhile we suffer and are unfit for duty.

Assisted by two ZUTOO Tablets, which by the way are as harmless as the soda they contain, nature will remove the pressure and stop the headache in twenty minutes. Why continue to suffer? Why be unfit?

It is really remarkable how many people now use ZUTOO to cure their headaches. Do you? If not, why not?
