WEEKLY REVIEW OF TORONTO WHOLE. SALE MARKETS.

WEDNESDAY, Dec. 11. PRODUCE.

The market has been decidedly quiet since our No. 2, ... Extra No. 3, ... Extra No. 3, ... No. 3, ... No. 3, ... manigation, and the consequent stoppage of the demand for shipment, though a dull feeling outside has No. 1, per 60 lbs. No. 2, ... also contributed to cause buyers to hold off. Offer. Rye ... continued to decrease. They guet and weak. English quotations show a fall of do n spring and red winter, and 2d on club wheat; at 3d on corn, and 6d on peas, during the week; cargoes seem to be neglected, one cause of which may be in large home deliveries last week. Supplies seem to have been on the increase; the total supply of wheat and flour for the week ending on the 30th uit. was equal to 525,625 to 533,750 gras of wheat, vs. 411,000 to 420,624 grs. weekly consumption, indicating a surplus in supply over consumption. of wheat, vs. 41,000 to 420,624 qrs. weekly consumption, indicating a surplus in supply over consumption of 114,625 to 133,026 qrs. The supply of maize for the week was equal to 1,200,000 to 1,240,390 bush, against an average weekly consumption in 1877 of 1,261,124 bush, vs. 1,390,774 bush in 1876, and 773,853 bush in 1875. The amount of wheat and four on passage for the United Kingdom, Dec. 5th, 1878, shows an increase of 100,000 qrs on the week, 11,000 qrs from American Atlantic ports, 90,000 rs from California and Oregon, and 21,000 qrs from grs from California and Oregon, and 21,000 qrs from Chili and Australia; and during same period, 123,00 qrs maize, comprising 6,000 qrs from the Danube, and 117,000 qrs from American Atlantic ports; also 18,000 qrs from Slack Ses. Azov Sea and the Danube, and nil qrs from America. Further cable advices to the 3rd inst, scate that the trade was kept dull by the heavy supplies from abroad. Much of this foreign wheat was going direct to millers who were buying largely. Stocks in granary were, consequently, not much increased. Mail advices to the 26th uit, state that French markets during the preceding week were more active with increased supplies and firmer prices, an advance being reported in thirty-six out of ninety-two markets whence reports had been received. Stocks at Marseilles were reported at 3.5,000 qrs; millers there were purchasing freely and previous Stocks at Marseilles were reported at 3:5,000 qrs; millers there were purchasing freely and previous prices were firmly scaintained. In Germany trade was quiet at Berlin with fluctuating prices and small offerings of wheat. At Hamburg trade remained quiet, and prices were generally unchanged with small receipts. Russian advices report some activity at St. Petersburg with sales for delivery next year and for shipment to Revel before the closing of that port. In Roumania an improved demand for wheat was reported at the Galatz market, with some sales effected. At Alexandria wheat was advancing in consequence of small receipts and stocks, sand a demand for the supply of local needs. Australian advices report a cessation of exports from South Australia. The shipments from January 1st Eralian advices report a cessation of exports from South Australia. The shipments from January 1st to October 5th had been 128,008 tons, leaving still 30,323 tons available for export. The Victoria surplus still amounted to 10,000 tons, but the New Zealand surplus was nearly, if not quite, exhausted; the growing crop, however, had good promise. The wheat harvest in Victoria, South Australia and New Zealand comes in January; nothing over an average crop was expected in South Australia. Markets on this continent have been quiet and weak, although a seems probable that, purchases with intent to create a "corner" are being made in the western markets. The general opinion there seems to be that bottom has been touched, or at least that wheat is a safe investment at present prices. In face of this view, however, it e downward, and that Chicago quotations for Jan
