Sure Way to Regain Robust Bloom of Youth

A smooth, velvety-soft skin, with a delicate peach-like bloom, is one of the Creator's most exquisite works. When the first blush of youth is over, this beautiful tint and satiny lustre are rarely seen. How to preserve them—that's the question. Famous beauty experts abroad long have known that ordinary mercolized wax works wonders in this direction. It actually gives a new surface to the skin, restoring that marvelous girlish color and softness in a remarkable manner. An ounce of this wax, procurable at any drug store, will convert a faded, freckled, worn-out or discolored complexion into one of captivating loveliness in less than two weeks. No special skill is necessary in applying the wax, it being smeared on at night like cold cream and washed off in the morning. A smooth, velvety-soft skin, with
