L. AND P. S. BARBED **WIRE FENCE IS NOT** LOVED BY TALL MEN

Chicken Wire Inclosure Hard GENERAL INSPECTION On Fat Men in Crowd.

GET SLIM SYMPATHY

Holiday Crowds Find Much Amusement at Expense of the Victims.

Much has been said in words more expressive than eloquent about the new netting which constitutes the latest alleged improvement made by the Port Stanley railway commission at the lake-side jumping-off place. This much has been chiefly said by the more impatient nd less restrained members of crowds struggling to reach a train returning to

Some people forget about the barbed-wire stockade after they finally do get back to London, but others have a better memory, a more vindictive and un-lorgiving memory, and so they button-hole newspaper writers on the streets and say: "Why don't you write up the barbed-wire entanglements down at Port Stanley depot'

Pity the Tall Man. of course it is only an unusually tall man who gets his hard hat punctured by the four or five strands of USED CAR SALE AT barbed-wire which slant outwards from the station inclosure, presumably to dis-courage athletically-inclined people from climbing over the chicken-netting. And very tall men are hated with a malicious kind of invious hate, just because the are able to see over the heads of a crowd. By the same taken, a tall man is a better target for the throwers of brickbats and empty pop bottles in time of a riot. Just as a fat man has to be tall man has to be diplomatic, be cause he can be easily spotted or "not-ted" in a crowd. Nobody seems to have any real sympathy either for very tall men or very fat men, but whereas the meshes of the chicken-netting are sufficiently close to obviate any sugof discrimination against fat men, inasmuch as not even a rabbit could crawl through the netting, the harbed-wire is just placed low enough to castigate a tall man's headgear.

Psychologically Obnoxious. resulting from barbed-wire cuts. But whereas more urban styles of fencing coming into use on the back con cessions, the barbed-wire market has been encouraged by the erection of the ew Port Stanley stockades, and even London one notices its use, on top of the board fence surrounding a convent, for instance; and there used to be a few strands of it strung across St. Paul's churchyard to discourage tres-passers. But enough about barbed-wire. To the sensitively inclined, it's shee barbarous barbarity.
Why Not Both Ends?

As for the inclosure itself, nobody has ever tried to show that the number of people coming into London is so very much greater than the number going If barbed-wire and chicken-net ting are not necessary at the London end of the line, why should they be necessary at the Port Stanley end? To car, may be one answer. But the numbeach to the uptown station can scarcely have been so great as to constitute a leaving Port Stanley uptown would net the free-ride be overcrowded when the free-ride while the pinion straps were placed, grafters got off. As it is complaints today are fairly numerous about women and children being crushed in the crowds that battled to get through the gates, and about families getting separous the short space from McFad-

THE FAIR GROUNDS

Western Ontario Car Owners Have Unusual chance to Get Big Values.

The sale of used cars which is being held at the Western Fair grounds all this week offers an unusual opportunity to the people all over West ern Ontario to obtain some really ex-cellent cars at prices which mean a big saving. The sale now being conducted at the fair grounds markes another step in London's increasing im-portance as an automobile centre. It is a result of the auto dealers of Lon-don pooling their used cars and offering them at greatly reduced prices.
There are more than 100 autos to There are more than 100 autos to choose from, and the London auto dealers are offering car owners of London and district an opportunity to trade in their present cars and obtain better ones. Wilfrid Hodgins is president of the London Automotive Dealers' Association under whose direction the big reals about barbed-wire anyhow. McFadden's cell was an improvised affair, in order to have him near the regular death cell, in which Hotrum was placed, and also to have the proceedings carried out with as much expedi-ency as was possible.
