

especial progress has been made in education. The number of schools has been
increased two or three times, until now
Japan, in addition to universities and
higher technical and commercial schools—
the peer of our own in this country—
has provided so liberally for the younger
ones that the elementary schools are fitted
to accommodate ninety-two per cent, of
the children of school age. Ample provision is also made for the education of
women and girls.

The establishment of tynical factories

lish, and the evident sincerity of his statements and spinions.

Mr. Kato made no pretence at covering the whole of Japan's history, but he out intended the Japanese as "not simply playing with their fans under the paper lanterns, as many suppose, but a strong and active people. For about 260 years before the people. For about 260 years are the people of living of the older Japanese as the secondary and subscience of the highest sand and the country. For some 2.560 years Japan has had an emperor for the central lower in the state, and although he has from time to time for the ruling power still the lang always of the ruling power still the lang always and some the people. The soldlers under the lords were hereditary, and as has been quite usual under similar conditions elsewhere in the world, the soldlers were of the highest rank among the people. The soldlers were of the highest rank among the people. The soldlers were of the highest rank among the commercial people, and whole the secondary and subscription of the secondary and subscription of

THE BATTLE-SHIP WAYAZ SUMPOFF

to Japan. From this it may be seen how much Russia has extended her territory in the Far East Fecently. The natural consequence of her expansion would be to endanger the very existence of Japan. The latter evidently could not wait until Russia was fully prepared to propose a Japan-see port for a Russian naval base, for the sake of peace in the Far East, so she was obliged to protect herself before the Russians gained a firmer hold on the adjacent coasts. The struggle of Japan is for her existence as a nation.

facts upon which to found an intelligent opinion of his prowess as a warrier. He

ENORMOUS COST OF THE WAR.

Statistics of the war loans issued by Japan and Russia are appended, with comparisons of the daily war expenses and of the public debts of both nations. Exclusive of losses in material and ships, it would appear that nearly \$737,000,000 already has been expended by both countries in carrying on hostilities, and that the war expenses of Japan are about \$203,000,000 less than those of Russia. The loans obtained by Japan are also \$270,000,000 less than those procured by Russia.

Interest requirements annually, about \$38,500,000. Cost of war daily, about \$1,200,000. Russia's total interest-paying debt exceeds Japan's national debt by

According to the estimates of M. Drux, the financial expert of the Echo de Paris, the cost of the war to Russia for the year ended February 14 last was \$365,000,000. Figuring on the same basis for the 105 days since elapsed, the war to date has cost Russia (exclusive of ships and material destroyed) \$470,000,000.

A CANADIAN DANDY.

From M. A. P.

The smartness and fashionableness of the stage and private dress of Mr. Arthur Roberts frequently brings the wearer of it such inquiries by post as one can imagine the writer of a men's fashion column is in the habit of receiving. In one of the musical pieces at the Prince of Wales' from United States mills. The war duty the arre, the popular comedian, playing the

THE ISLAND RAILWAY.

News-Advertiser.

The completion of the negotiations between Mr. Dunsmuir and the Canadian Pacific Railway Company—which we are able to announce today—for the acquisition by the latter of the Esquimait & Nanaimo railway and land grant, will doubtless be a source of satisfaction to the people on Vancouver Island. In the hands of the larger corporation the development of that portion of British Columbia should advance apace and the vast natural riches of the Island be the basis of great commercial and industrial activity.

Interest requirements yearly, about \$25,000,000.

Public debt at the beginning of 1904, \$283,000,000.

War expenses daily, about \$850,000.

The figures that are obtainable as to Japanese expenses show that up to the end of July last—the first six months of the war—the outlay for hostilities was \$100,000,000.

On this basis the cost for the ten months since elapsed would be about \$167,000,000, making the total war expenses to date \$267,000,000.

Excess of Russian expenses over those of Japan, \$203,000,000.

Excess of Russian expenses over those of Japan, \$203,000,000.

PROGRESSIVE CANADA.

The Canadian Grocer states that "the outlook for Canadian trade was never brighter. Work is plentiful and wages are good, a condition which applies to the cities and large towns no less than to the rural districts throughout the country. That confidence is felt in the industrial outlook is amply shown by the new industries that are starting into life almost every day. The ceaseless tide of immigration that is flowing into Manitoba and the Northwest provinces has opened up a field for manufacturers that would seem to be almost inexhaustible. Last year the influx of settlers was remarkable. This year it promises to eclipse all previous records. Canada stands forth, if not as a land flowing with milk and honey, at all events as the country par excellence for ambitious, intelligent and industrious workers. If Canada has substantial attractions for the settler, not less are the inducements she has to offer to the manufacturer, and this fact is beginning to be recognized. American capital especially is being employed to build factories and establish trade in the Dominion, and traveling representatives of American concerns are as common in Canada as pebbles on the sea shore. Sir Wilfrid Laurier has been guilty of a prophecy, but it is a prophecy of which the seeds of fulfilment have already taken root. He said: The inteteenth century is a canada."
