The first resolution, moved by Rev. Charles Shortt and seconded by Frederick T. Atwood, recommended that public action of exceptional character should be taken to provide at least temporary employment for all the unemployed. The mover and seconder spoke in favor of their resolution.

In his first sentence James Campbell referred to the new reading room at the Public Library as a place of laziness. This was greeted with a storm of hisses. When he got a hearing he complained of the method of distributing relief at the House of Industry. The motion was carried unanimously.

The necessity of pushing on public works was expressed in a resolution proposed by K. R. McKenzie. Mr. McKenzie said that, while he and others could not secure bread, some people were able to pay \$5 to hear a concert.
