

# PREVENTS AND CURES DIPHTHERIA.

Our **Antidiphtheritic Serum** is not less valuable as a prophylactic than as a curative agent. It should be used in all exposed cases.

Our **Antidiphtheritic Serum** is manufactured in strict accordance with the principles of modern asepsis. It is prepared under the personal supervision of bacteriologists of national reputation. It is subjected to the most rigid physiological and bacteriological tests. It is supplied in hermetically sealed glass bulbs, which insures its freedom from contamination.

The purity and reliability of our **Antidiphtheritic Serum** are beyond question.

## THE BEST VACCINE

Unquestionably the best vaccine virus on the market today is our Aseptic Vaccine—best because surest and safest. It affords ample protection against smallpox without the accompaniment of painful arms and disfiguring ulcers. It produces—not trouble for the physician and suffering for the patient—but the typical Jennerian vaccine vesicle. Our vaccine virus is what its name implies—*aseptic*.

Glycerinated, in sealed glass capillary tubes, each holding sufficient for one vaccination, in cases of 10 tubes and 3 tubes, with small rubber bulb to expel the contents; points, in boxes of ten, each point enclosed in an impervious envelope.
