

# FORT FRASER

(The Hub of British Columbia on the G.T.P.)

When the "last spike" is driven in the Western Canada Division of the Grand Trunk Pacific Railway in the summer of 1913, what then will be the value of property in Fort Fraser?

1. In the heart of British Columbia, on the main line of the Grand Trunk Pacific, on Fraser Lake and the Nechaco River, commanding over 1,000 miles of navigable waterway; a natural rail, lake and river centre, affording an easy grade for railroad building in every direction.

2. Surrounded by ten million acres of the richest agricultural land in all the West, including the famous Nechaco, Stuart Lake, Bulkley, Blackwater, Ootsa Lake and Peace River Valleys. Also within 125 miles of the big Omineca, Finlay River and Cariboo mining districts, as well as the immense coal fields west of the Bulkley Valley.

Every tie that is now being laid and every spike that is driven adds to the value of Fort Fraser property. Lots are now selling at \$100 and upwards, on terms of one-tenth cash and the balance in eighteen easy monthly payments, without interest or taxes. Don't let this opportunity go by—investigate it at once. Call or write for particulars.
