

McGILL UNIVERSITY
MONTREAL

FACULTY OF APPLIED SCIENCE,
OFFICE OF THE DEAN

February 22nd.1927.

Sir Arthur Currie, G.C.M.G., K.C.B., LL.D.,
Principal,
McGill University.

Dear Sir Arthur,

After careful consideration of the question of the disposal of the medals offered by His Honour the Lieutenant-Governor, I would suggest that one silver and one bronze medal could be fittingly awarded in the Department of Architecture. The silver medal might be awarded to the student obtaining the highest standing in the graduating class, and the bronze medal to the student coming second, always provided that their work is of sufficient merit.

A British Association bronze medal is now available in each of the Engineering departments, and one such medal is awarded to the student in the graduating class who attains the highest standing in each of these departments, provided that his work is sufficiently good. A British Association medal is also available in the Department of Architecture, but inasmuch as the work of that department is quite distinct from that of the Engineering departments and in some aspects has particular relations to the life and culture of the Province of Quebec, it would seem to be fitting to award the Lieutenant-Governor's medals in the Architectural course.

For some years past Professor Traquair and his associates
