

ONTARIO'S MINING LANDS

EXTENSIVE GOLD FIELDS, ABUNDANT SUPPLIES OF IRON,
LARGE DEPOSITS OF COPPER, NICKEL, SILVER,
MICA, GRAPHITE, CORUNDUM, ETC.

IN the Province of Ontario there is great mineral wealth, comprising the precious and useful metals and many important non-metallic minerals. In fact, almost every variety of valuable or useful material found in the earth's crust is known to occur in Ontario in greater or less abundance.

The gold fields of the northwestern part of the Province, the iron ores of Michipicoton and the Rainy River District, the nickel-copper ores of the Sudbury region, and the corundum and mica of the Eastern Counties, though only in the early stages of development, show how great and widely spread are these natural resources.

The rock formations in which the known deposits of gold, silver, copper, nickel, iron, corundum, etc., occur extend over large areas, much of which has been very little explored. Along the greatest axis of the mineral-bearing belt—from the St. Lawrence River to the boundary of Manitoba, a distance of about 1,200 miles—runs the Canadian Pacific Railway, and the numberless lakes and water-routes which extend in all directions enable the prospector to take his canoe almost anywhere.

Crown Lands are sold at \$2.00 up to \$3.50 per acre, or leased at \$1.00 per acre for the first year, and 15 to 30 cents for subsequent years.

For copies of the Mining Law, reports, maps, and other information, apply to

Hon. E. J. DAVIS,

or ARCHIBALD BLUE,

Commissioner of Crown Lands,

Director Bureau of Mines,

TORONTO, Ont.
