Thursday Evening, June 15. New high records were reached by both Hollinger and Northern Ontario Exploration to-day, but outside of these two features there was very little of interest in the mining exchanges. The market seemed to have run into a perfod of waiting, and while offerings any other raising of prices.

It would seem that Northern Ontario above last night's top figures. The Hollinger stock was strong at the close, with bids of 7.74 In evidence.

Hollinger established another record top 'price at \$16.20, an advance of 20 points above the previous high hung up yesterday. Profit taking was in evidence on the bulge, however, and the shares sold back to \$15.87\% under this influence. Traders who had been playing the market for a quick turn, playing the market for a quick turn, Beaver ... were reported to be taking their profits Beaver ... 4t the high figures.

There was not much doing in the Gn-Meehan

at the high figures.

There was not much doing in the other Porcupines, the market bearing signs of being in the doldrums as regards activity. Rea sold up to 6.15, and then lost 25 points, closing at 5.90, or 5 points below yesterday. Preston dropped back a point at 23½, and closed offered at that price. Vipond sold as low as 60, but moved up to 61 on the afternoon board.

Outside of a few fireworks in Timiskaming, there was practically nothing whatever doing in the Cobalts. Timiskaming was under pressure of what was taken to be short selling early in the day, and sold as low as 60½, over two points below yesterday. The shares rallied sharply from the low figure, and recovered to 6½, when the shorts were forced to cover.

The market closed dull, but with prices generally firm.
