

MUNYON'S INHALER

CURES CATARRH, Colds, Coughs, Asthma, Bronchitis and All Throat and Lung Troubles.

It reaches the sore spots.
It heals the raw spots.
It goes to the seat of the disease.
It penetrates obscure places where
drugs taken into the stomach cannot
reach.
It acts as a balm and a tonic to the
whole system.
Better than doctors.
Better than going to Florida.
Better than anything you have ever
tried.

PRICE \$1.00.

With everything complete, at all
druggists, or mailed from our office, 11
and 13 Albert street, Toronto.
Munyon Remedies for sale by all
druggists—57 cures for 57 ills—mostly
25 cents a vial.
Personal letters to Prof. Munyon,
1,505 Arch street, Philadelphia, Pa., U.
S. A., answered with medical advice
for any disease.

ABOUT THE CITY PARKS

Under the Present Management
the Parks Will Not Amount
to Much.

The Views of President Gam-
mage of the Canadian Horti-
cultural Association.

There Should Be a Park Superin-
tendent—How London's Shade Trees
Might Be Improved—Where the Lo-
cal Horticultural Society Is Lacking

Mr. Wm. W. Gammage, president of
Canadian Horticultural Association, in
conversation with The Advertiser yester-
day afternoon, said: "London is
away behind the times in the matter
of parks."

"What should be done to improve
them?" he was asked.

"With the parks under the present
management I do not think there is
much possibility of improving them.
For one thing, the citizens are gen-
erally satisfied with the way they are
at present. For another thing the
council is not generously enough dis-
posed to grant sufficient money to
make the parks what they should be.
There is among the citizens a lack of
proper appreciation of the parks. The
unsightly thoroughfares which people
make across the grass in Victoria
Park demonstrates this. I do not think
that walking on the grass should be
prohibited altogether; but people in
making a short-cut across the park
should have the common decency to
keep on the paths. The grass in Vic-
toria Park should have a thorough
renovating."

"If the present management is un-
satisfactory, under what control
should the parks be?"

"It is time that the whole of the
parks should be in one system, under
the management of a board of com-
missioners, with a competent superin-
tendent, he to have the supervision of
grounds attached to all city and im-
proved buildings. Springbank and Queen's
Park should be kept as recreation
grounds, with a little more ornamenta-
tion, but their naturalness not to be
eliminated. Some of the 15,000 trees
recently purchased for Springbank
Park might well be distributed among
the other parks of the city."

"If such a system were organized,
what would you suggest being done
in the way of improvement?"

"Well, for one thing, the greenhouse
at Victoria Park might be moved to
Queen's Park and enlarged. It should
be there to serve the double
purpose of furnishing a general supply
of plants for the whole system, and
also be a place of interest for visitors
to the city. Victoria Park could be
made of educational value by having
the trees, shrubs and herbaceous
plants labeled with their common and
botanical names. Citizens would then
have something to guide them in mak-
ing selections for their own use.
New varieties of plants and trees
should be introduced, and there
are many details in which the
park could be improved. Something
should be done also to care for the
city's shade trees. London is particu-
larly fortunate in the matter of
shade trees, but that is no reason why
they should be neglected. One man
should supervise the trimming of the
trees and prevent everyone from
slashing and smashing into them as
they choose. An effort should also be
made for uniformity in planting. At
present one man may plant his trees
ten feet apart, and his neighbor pre-
fers to have his 30 feet apart. This
irregularity could be overcome if the
city would have the work done by con-
tract under the supervision of
the park superintendent. The
board in control of such matters
might also agree to replace the trees
if they did not live. It would not cost
the department as much to do the
work as it would an individual, and
all the latter would have to do would
be to send in his application for the
trees. Another evil exists in that
many of the shade trees are not trim-
med high enough from the ground.
When the bottom branches are heavy
with rain or snow they are so low
that one can't walk under them
without stooping. There should be
plenty of room under the trees for the
free circulation of the air. All this
the superintendent would remedy."

"But wouldn't the cost of these im-
provements be great?"

"It would certainly cost more than
the present system or lack of sys-
tem. But that is very little. Lon-
don contributes less towards the
parks than any city I know of. The

extra amount required would be more
that returned in the advertising the
improvements would give the city, to
say nothing of the education and
pleasure they would afford the citi-
zens."

"Why doesn't the local Horticultu-
ral Society do something along these
lines?"

Mr. Gammage regarded the question
as an awkward one. "I think it should
be one of the objects of the society to
offer recommendations on such mat-
ters," he said. "It was never the in-
tention of the promoters, when a grant
was provided, that the society should
exist merely to hold one half-hour
session each year, for the purpose of
electing officers, or even solely for the
giving of prize money for exhibitions
as is done by a number of the societies.
The object as I understand it, was
for general education, for holding
meetings and discussing topics of in-
terest, and introducing new plants,
trees and shrubs. I do not want to
be misunderstood as casting reflection
upon the present management of
the society. They are merely follow-
ing a long-established precedent in
holding their yearly meeting as they
do and of handing the government
grant and all other funds to the West-
ern Fair Association. This is of
course but a means to an end—the
encouragement of better floriculture
by prize-giving—but I think it is in-
sufficient."

A BICYCLIST KILLED

Andrew Stokes, a Goderich Boy, Fa-
tally Injured.

Goderich, April 21.—Between 9 and
10 o'clock this morning, as a youth
named Andrew Stokes, on a bicycle,
and a man named Young, in a buggy
were turning a corner the wheel and
buggy collided, smashing the wheel
and throwing the boy off with great
violence. After the accident Stokes
got up and was walking away, when
he suddenly fell to the ground, and
was picked up and taken home, when
it was found that he was internally
injured, and broken ribs were press-
ing on the lungs. The injured lad
died six hours after the occurrence,
which was supposed to be purely ac-
cidental.

A TIME OF DANGER!

Thousands in Peril.

Blood and Nervous
Troubles Develop
Disease.

Paine's Celery Compound
The Great Modern Blood
Cleanser and Nerve
Builder.

Paine's Celery Compound is the
wonder of the age! Its marvelous
virtues form themes of discussion
among the interested medical men,
and its cures are talked of at every
fireside in Canada. Paine's
Celery Compound is far beyond com-
petition.

Other medicines have been devised
by speculators and experimentalists
to cure the ailments and diseases that
Paine's Celery Compound so success-
fully cures with, but every effort in
the direction of deceiving the public
has resulted in failure and disaster
to the promoters of fraud and decep-
tion.

To a large extent the present popu-
larity of Paine's Celery Compound is
due to the fact that it has accomplish-
ed some of its grandest work in the
spring season—a time when man and
woman usually complain of ill-health,
loss of vitality, tired feeling—a time
when people feel dull, listless, de-
pendent and ambitious.

The usual ills of life, neglected in
the spring season, often beget serious
and fatal diseases.

There are thousands of business
men, mechanics, farmers, as well as
wives and mothers, who, though able
to walk around, are nevertheless
sadly "out of health."

Paine's Celery Compound is the
great health-restorer and strength-
giver for those who are just now
perilously near some organic disease.

Paine's Celery Compound quickly
and surely removes all impurities from
the blood, and gives a fresh circula-
tion power that tones all the organs
of digestion.

Paine's Celery Compound besides
producing pure and ruddy blood, will
regulate every set of nerves, feed the
tissues, and give that true condition
of health which makes life worth liv-
ing.

If you, dear reader, feel that your
health is not as robust and vigorous as
it should be at this time of the year,
let us ask you to make use of that
medicine which has given such won-
derful and cheering results to others.
Be assured that Paine's Celery Com-
pound "makes sick people well."

Next to seamen in the United States
British seamen get higher wages and
better fare and more comfortable con-
ditions of employment than do seamen
of any other country.

CATARRH RELIEVED IN 10 to 60
MINUTES.—One short puff of the
breath through the Blower, supplied
with each bottle of Dr. Agnew's Ca-
tarrh Powder, diffuses this powder
over the surface of the nasal passages.
Painless and delightful to use. It re-
lieves instantly, and permanently cures
Catarrh, Hay Fever, Colds, Headache,
Sore Throat, Tonsillitis, and Deafness.
Sold by C. McCallum & Co.

New Jersey fruit growers, as a rule,
believe there will be an immense crop,
as the buds had not developed enough
to be damaged by the cold weather.

Don't Tear Down—Build Up.

The old-fashioned theory of tearing
down disease was entirely changed by
the advent of Dr. A. W. Chase's
Nerve Food, which cures by creating
new rich blood and nerve tissue.
Through the medium of the circulation
and the nervous system they strength-
en and invigorate every organ in the
human body.

Canada's Greatest Seed House

A GOOD TURNIP CROP

Means Well-Fed
Stock

GROWERS' FAVORITES:

STEELE, BRIGGS' "JUMBO" Swede
Grows handsome, tankard-shaped roots, of a purplish-crimson
color above ground, yellow beneath; stands well out of ground,
grows roots of giant size. Price (post-paid) 1 lb., 10c.;
1 lb., 15c.; 1 lb., 20c.; for 5 lb. lots and over, 20c. lb.

STEELE, BRIGGS' "SELECTED" Swede
For over ten years the favorite with best growers; even, hand-
some shape and a great cropper. Many tons of seed are re-
quired annually to supply the demand for this fine variety.
Price (post-paid) 1 lb., 10c.; 1 lb., 15c.; 1 lb., 20c.; for 5 lb. lots
and over, 20c. lb.

SPECIAL NOTICE.—Steele, Briggs' "Jumbo" and
"Selected" Swedes are sold in sealed packages
only (1 lb. and 1 lb.) as shown in accompanying illustrations
always bearing their name.

The House of Commons Makes
a Change.

Mr. McNeill on Preferential Trade—A
Senator Resurrects the Manitoba
School Question.

Ottawa, April 22.—No suggestion was
ever accepted with greater alacrity
than was Sir Wilfrid Laurier's mo-
tion at 3:25 o'clock yesterday after-
noon, "that this house do now ad-
journ."

PREFERENTIAL TRADE.

Mr. Alex. McNeill, M.P., has given
notice of a motion concerning pre-
ferential trade, in which he details the
statements made on the question in
1896, the expressed views of the Duke
of Devonshire and the colonial secre-
tary's views at the colonial confer-
ence. Mr. McNeill's proposed mo-
tion concludes as follows: "And this
government have not, in response to
these repeated advances by the im-
perial authorities, made any attempt
to secure for the produce of Canada
that preferential treatment in the
markets of the United Kingdom which
would be of such inestimable value to
the farmers and other producers of
Canada (competing against foreign
rivals in the markets in the United
Kingdom), would set in motion a
great tide of immigration to our
shores, people the vast wheat areas
of the Canadian Northwest, enhance
farm values in the older provinces,
promote the unity of our empire and
speedily deliver it from dangerous de-
pendence upon the foreign food sup-
ply."

OTHER BUSINESS.

Mr. Blair moved that on Tuesday
next the house should go into commit-
tee of the whole on the Drummond
County Railway purchase resolution.
Sir Charles Tupper asked that a later
date should be fixed, as he would not be
present on Tuesday, and it was agreed
that the resolution should be debated
on the next government day after
Tuesday.

Mr. Mulock made a similar motion in
regard to the Pacific cable resolution,
and the same arrangement was made.

Sir Charles Tupper stated that he no-
ticed with great regret from the news-
papers that the secretary of state for
the colonies had not yet agreed to
this arrangement. He asked the
premier to lay on the table all corre-
spondence between himself as high
commissioner and the government on
this matter, as he thought it would
strengthen the hands of the govern-
ment in an important point.

Sir Wilfrid Laurier promised that
everything that could be brought down
would be brought down.

Mr. Foster asked Mr. Fielding if he
could give any information as to the
probable time when the estimates
would be brought down.

Mr. Fielding replied that he was
hardly able to fix the time at present,
but that at a very early stage an an-
nouncement would be made on behalf
of the government.

IN THE SENATE.

There was a revival of the school
question in the senate when Senator

Perley moved for a copy of correspon-
dence between Archbishop Langevin,
of Manitoba, and the Federal Govern-
ment on the question of schools. Sen-
ator Perley, in a somewhat diffuse
speech, narrated a conversation be-
tween himself and the archbishop,
which took place in a train last March.
His grace, according to the Senator,
had spoken of a letter, which he said
he had written to Sir Wilfrid Laurier,
and had invited his interlocutor to ask
for a copy of it, an invitation which the
senator accepted. In making the de-
mand Senator Perley said several
things, among which were expressions
of opinion to the effect that there
should be no law prohibiting religious
teachings in schools, and a repetition
of a rumor which Mr. Perley said he
had heard, to the effect that the arch-
bishop had accepted "bush money"
from some of the ministers.

ENGINEER GRAHAM,
Of Montreal, Cured of Diabetes by
Dodd's Kidney Pills.

Montreal, April 24.—Proof positive
and convincing has already been given
in Montreal that Dodd's Kidney Pills
are the only sure cure for that dread
disease Diabetes. And day after day
fresh evidence comes to light, to make
the proof more emphatic and convinc-
ing.

Engineer James Graham, 50 Victoria
Square, says: "I suffered with Diabetes
for six years. One of our best doctors
told me I could not be cured.
"I read of Dodd's Kidney Pills and
decided to try them. Three boxes made
me well, and I have not suffered from
Diabetes since."

Such cures as this prove the efficacy
of Dodd's Kidney Pills.

The special delivery letter system,
like that of the United States, is now
in operation in ten of the chief cities
of Canada.

LIFE SAVED.—Mr. James Bryson
Cameron writes: "I was confined to
my bed with inflammation of the
lungs and was given up by physicians.
A neighbor advised me to try Dr.
Thomas' Electric Oil, stating that
his wife had used it for a throat
trouble with the best result. Acting
on his advice I procured the medicine,
and less than half a bottle cured me; I
certainly believe it saved my life. It
was with reluctance that I consented
to a trial, as I was reduced to such a
state that I doubted the power of
any remedy to do me good."

St. Petersburg will have a horticultu-
ral exhibition from May 17 to May 27,
and a poultry show from May 13 to
May 23.

A DINNER PILL.—Many persons
suffer excruciating agony after partak-
ing of a hearty dinner. The food par-
taken of is like a ball of lead upon the
stomach, and instead of being a health-
ful nutriment, it becomes a poison to
the system. Dr. Parmlee's Vegetable
Pills are wonderful correctives of such
troubles. They correct acidity, open
the secretions and convey the food
taken of into healthy nutriment.
They are just the medicine to take if
troubled with indigestion.

LIFE...

To live today as if you were to live
forever is not bravery; it is foolhardi-
ness. A day too late in insuring your
life is as bad as a year too late, and
tomorrow may find you no longer an
acceptable life. This should suggest
immediate action on your part by in-
suring in that strong and successful
Company—the North American Life.
A policy in the North American is
a contract, combining the maximum
of legitimate advantages, in a com-
pany having an unexcelled financial
position.

See our agents, or write direct to the
Head Office for full information as to
plans, etc.
