MeIntyre & Wardwell say:

The stock market was favorably inducated to-day by its oversold condition late yesterday by traders, on the uniform reports of British delicate and the absence of any pressure to sell, coupled with reports from London of Pritish success in turning the Boers' left flank. There was no confirmation to these later reports, but like yesterday they served their purpose for operations in the market by the professional element. About 15 per cent. of the business was scalping and professional. London houses bought about 1,000 shares on balance, otherwise nere was no outside demand. Foreign exchange was firm and call money continued easy. The traction stocks were again well bought to the supposition that the Standard Oil people are very largely interested and on ramors that the underground tunnel scheme will fall thru, but this latter was entirely without foundation. Next to these, stocks, American Steel and Wire and Federal Steel showed the best buying, former on statement by insiders that the dividend rate on Jan. 29 will be at the rate of 6 per cent. per annum, payable quarterly. Federal Steel advanced in sympathy, as did other steel and iron stocks. Sugar advanced on covering of shorts, as did also The market closed firm at about best prices. The immediate outlook remains unchanged, with war news the dominating factor, and as a consequence we look for continued small and narrow traders' market.

continued small and narrow traders' markets.

The bank statement is expected to be good, but not as favorable as last Saturday's.

Bartlett Frazier & Co. (J. A. MacKeilar), 21 Melinda-street, received the following despatch:

A surprise party was furnished the Wall street fraders this morning, in that London prices showed sharp fractional advances over last night's closing. General opinion here before the opening, judging from the press despatches regarding war news, was that London would be a considerable seller; on the contrary, buyling orders were received, the not in large volume. Opening prices were stiff, advancing to the foreign parity, purely in symitation.

pathy, as very little more interest was displayed than for some time past. It only required about an hour to satisty all cemands of buyers or sellers and then a demaer dulness settled on the market than any known heretofore, which continued well past the moon hour. Sales to that hour only reached 92,600 shares. Traction snares were somewhat more active than the general list on a report that the timbel continuation of such a rumor and its consequent unreliability, this group of stocks all madesubstantial gains without much trading. In the afternoon another group was manipulated into a little life and activity, namely A.B.W. and F. S., which kindred stocks sympathizing. The advince at one time of 3 points in A.S.W. was based on the near approach of the dividend period on the common stock, the declaration of which is set for Jan. 29, and the expected large carnings statement to be published at that time.
