TO TAKE INK OUT OF LINEN.—Dip the spotted part in pure melted tallow; then wash out the tallow and the ink will come out with it. This is said to be unfailing.

A cheap method of preserving Cucumber Plants from the small fly or bug.—Break off the stalks of onions which have been set out in the spring and stick down five or six of them in each hill of cucumbers, and the bug will immediately leave them. It would be well after a few days to renew them; but one application has frequently been found to be completely effectual.

W. H. BREMNER, Printer & Bookbinder, Kent Street.
