

- White of egg, preparations and uses of, 404.
- White precipitate, 507.
- White's ointment, formula for, 579.  
directions for making and using, 579.  
modified by J. A. Lippincott, 579.
- "Wildhairs", to remove with nitric acid, 395, 396.  
treatment of, 639.
- Wild tansy, 525.
- Wilkinson, O., conjunctival hyperemia, formula for, 651.
- Wilson, Norton L., formula for iodized phenol in corneal ulcer, 718.
- Wines, general mention of, 76.
- Winter bloom, 475.
- Witch hazel, 19, 417, 475.  
see Hamamelis.
- Woodruff, F. E., formula for mercury in deep injections, 119.
- Woodruff, H. W., mercuric cyanide in serpen ulcer, 725.  
mercuric cyanide subconjunctivally, 503.  
recommends subconjunctival injections, 73.  
senile cataract, iodine preparations internally in, 759.
- Woodruff, T. A., formula for iodine subconjunctivally, 70.
- Woodson, J. M., dionin in corneal opacities, 458, 734.
- Wool-fat, sheep's, 404.
- Worrell, J. P., jequirity in trachoma, 388.
- Wounds, sodium iodate with boric acid in, 768.  
corneal, 752.  
treatment of, 754.  
with prolapse of iris, report of a case, 754.  
ocular, 833.  
infected, itrol in, 492.  
of eyelids, treatment of, 638.
- Wright, J. W., hydrastin in catarrhal conjunctivitis, formula for, 480.
- Wurdemann, H. V., chinisol in mycotic keratitis, 748.  
suprarenalin in simple conjunctivitis, formula for, 565.  
conjunctival hyperemia, formula for, 651.  
dacryocystitis, chronic, mucopurulent, formula for, 785.  
dionin powder for intraocular exudates, 458.  
hypopyon iritis, on, 90.  
quinosol in mycotic keratitis, 533.  
pyoktanin in chronic infection of lachrymal sac, formula for, 531.  
smarting from zinc collyria, to relieve, 415, 584.  
sympathetic ophthalmitis, argyrol in, 840.
- X
- Xanthelasma, monochloracetic acid in, by S. B. Muncaster, 637.  
treatment of, 637.
- Xanthoma, removal with monochloracetic acid, 395.  
treatment of, 637.
- Xanthopsia, 802.
- Xeroform gauze, 580.  
dry dressing of, 65.  
in corneal ulcer, 580.  
in phlyctenular keratitis, 65, 580.  
for profuse lachrymation of, 747.  
in place of iodoform, 65.  
insoluble, 580.  
substitute for, antipyonin, 414.
- Xerophthalmos, 707.
- Xerosis conjunctivae, glycerine and water in, locally, 707.  
oil locally in, 707.  
treatment of, governed by the cause of, 707.  
local, of little avail, 707.
- X-rays, 76, 77.  
after enucleation for malignancy, 77.  
Birsch-Hirschfeld on, 77.  
diseases in which treatment is effective, 77.  
Holzknecht on, 77.  
injuries from careless use of, 77.  
in carcinoma, reaction disappointing in, 77.  
in epithelioma, palpebral, 76.  
in sarcoma, reaction surprising in, 77.  
in vernal conjunctivitis, 76.
- Y
- Yeast, 442.
- Yeast serum, 189.
- Yellow, the hygienic value of, 591.  
glasses, advantages of, 592.  
mercuric oxide, 507.  
paper, advantages of, 592.  
precipitate of mercury, 507.  
precipitated oxide of mercury, 507.  
pyoktanin, 531.  
root, 479.  
salve, 508.
- Yohimbine, as a local anesthetic, 580.  
conclusions concerning, 580.  
dose of, 580.  
inferior to cocaine, 581.  
solubility of, 580.  
solution of, to preserve, 580.  
tree, 580.
- Young's rule of dosage, 22.
- Y-rays, 534.
- Z
- Zinc acetate, 581.  
with alumnol, 581.  
borate, in eczema of the lids, 582.  
very little soluble in water, 582.  
biborate, 582.  
chloride, as an escharotic, 582.  
in conjunctivitis, 582.  
in dacryocystitis, 582.
