## The Sense of Security

A man likes to feel that if his buildings burn down he has sufficient insurance to replace them. In the same way the business farmer likes to feel that when he has gone to all the expense necessary to produce a good grain crop, he has a machine which will successfully harvest it.

We suggest the well-known McCormick binder as being a machine which will do this work with the greatest certainty.

No grain is too tall or too short, too heavy or too light, or too tangled for the McCormick—this machine will work successfully in any field where a binder can be operated.

The McCormick has triumphantly stood the test of time, and today represents the highest attainment in the manufacture of harvesting machines.

This machine is a triumph of structural strength combined with compact solidity and correct style. The symmetrical design and the excellence of its work in the harvest fields of the world have made the name McCormick a household word in every country on the globe.

When mounted on the binder truck the

CANADIAN BRANCHES: Calgary, London, Montreal, Ottawa, Regina, St. John, Toronto, Winnipeg, INTERNATIONAL HARVESTER COMPANY OF AMERICA, (INCORPORATED) CHICAGO, U. S. A.

machine can be easily transported from one field to another, through narrow gateways, and can be stored in a limited space.

The McCormick knottor is simplicity itself, having only two working parts—fewer parts that move than there are fingers on the human hand.

The binder needle will not wear out, for the reason that the eye as well as the center of the frame and heel of the needle are fitted with hardened steel wearing pieces over which the twine passes.

The McCormick binder is a light draft machine,—it is the machine to buy.

The McCormick line of harvesting machines is complete and includes, besides grain and corn harvesting machines, binder twine, mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scufflers. Also gasoline engines, cream separators, hay presses, wagons, sleighs, and manure spreaders.

See illustrated catalogue for detailed illustrations and descriptive text of any or all of these machines. Call on the local McCormick agent for information or write nearest branch house for catalogue.

## DISPERSION SALE ESTATE OF HENRY NICHOL

Will sell by PUBLIC AUCTION on Sec. 3, Tp. 11, Range 19, 4 miles north of Brandon, at one o'clock sharp
