The Farmers' Market

Office of the United Grain Growers Limited, Winnipey, October 24, 1918.

OATS.—October futures gained 54 cents during the week ending October 19, and seember futures gained 34 cents. The chief influence has been the strength to merican markets due to government buying of cash oats and corn. Offerings in the cast market are light, and there are indications of difficulty in filling safes for October east market are light, and there are indications of difficulty in filling safes for October east markets with December. There is very little demand for cash oats, and present emising the following the continues to the present actual values, but are the result of artificial conditions, emising the following the safe and in American markets and the sharp advance in corn prices here the sharp advance in corn prices turned the attention of feeders to the use of the sharp advance in corn prices turned the attention of feeders to the use of the pairty, as showing better value. Locally, there is no improvement in the demand, and the pairty of the policy of the prices of a week ago, after an advance on short covering and in the week, followed later by a re-action.

Be sure all the buttermilk is washed out of the butter before packing, salt it lightly and work well to ensure a uniform color. Butter will keep better with from one-and-a-half to two per cent. of salt thun that made with from three to four per cent. of salt.

Keep the butter in the coldest place possible. In winter, keep it outside the house, in a shed where the temperature is low. The next best system is to put it in a glazed crock and cover it with a fairly strong brine which excludes the air.—L. A. Gibson.

#### Noon Minute of Prayer Daily

Por the purpose of bringing before the people of Manitoba the seriousness of this world conflict, and of supporting the men at the front, a proclamation has been issued by the Lieutenant Governor, Bir James Alkins, inviting all loyal citizens to cease work and suspend all business and traffic for the space of one minute at 12 o'clock each day during the period of October 28 to November 3, inclusive, for the purpose of publicly and privately offering thanks for the success of the efforts of the allied forces.

Farm machinery is still advancing in price and it behooves every farmer to protect his implements. Many pieces of farm machinery are shorter lived than accessary. The life of any machinemay be lengthened by protection from weather, by good lubrication and by prompt attention to repairs. Just as soon as the farmer fluishes using an implement it should be placed in the barn or under a good shed to be kept free from rust and in good condition for use the following season.

17.25 36.75 16.50 15.25-16.00 

A great many householders are now storing away their winter's supply of butter. In this connection, may I offer the following suggestions:—

Have the butter made from fresh-flavored, sweet cream. Butter made from very sour or stale cream will not keep' properly. It, will turn rancid erg shortly after being made.
