## THE COURIER

MONDAY, SEPTEMBER 23, 1850

The United States Mail Steamship rrived at New York on Saturday ever be spiled on the 11st

alls of the news by her may be exp

Details of the news by her may be expected to-day.

The comparative statement, which we previously published, of the freight which has passed through the St. Lawrence Canuls, according and descending, during the years 1850 and 1849, cannot prove otherwise than highly interesting to the commercial hody; and ought to furnish those gentlemen, who incur the trouble of acting as Cabinet Ministers, with useful leasons in their vocation as political scenomists. There is unmistakeable evidence on the face of the Report, that, that portion of our trade is declining, which conthat portion of our trade is declining, which consists in the carrying of produce from the interior to the point of export, and its consequent shipment from our scapous. There is a falling-off is the two essential tentures of commerce—in the amount of tonings employed, and the number of tons of produce conveyed. Now, we who are meraly spectators of the working of the Lafontainite Cabinet, who withhold from it our confidence, who question the soundness of the policy which guides it, may fairly hold in our hands the official Report upon which we comment, and sak the Report upon water we capect a pause in the downward course of decay and ruin, which their own statistics indicate as inevitable. The year 1850 has been one during which no public calemity afflicted the land—unless we account Lord Elgin and his Ministry as such ; the harvest has been abandant; we have had neither Ship Fever nor Cholera to paralyze industry, or deter emigration; our towns and villages have swarmed with Ameri-can travellers, without whose liberal expenditure hotel keeping and steamboat-owning would have less employment. Yet, in the face of all the advantages which nature conferred upon us, and all the aids which art, stimulated by an outlay of millions, has extended, to swell our ree, the statistics demonstrate that we are retrograding—that the elements of wealth are ing away, and the Colony suffering from that most formidable of diseases, a commercial atro-phy. We shall cite one article enumerated in the ist, because it has hitherto formed an important item in the export trade of the Colony; and i must in future times be regarded as the chief product of the land. Lumber can be exhau whereas the cause of the extinction of the lumb traffic, in the foundation of the growth of an agricultural class; and though the time may come about, remote as it now seems, when we, like the New Korkers, shall be compelled to import inm-ber, it is not the less certain that every year augments the extent of forest land, reduced to cultur and swells the four-producing power of the Colony. We do not insinante that Canada has fallen off in her power of growing wheat, because the statistics show a diminution in

ate route, to the manifest injury of our pping; our sen-ports; and out traders; Colo-l politics are such a mess of reciprocity and ity ; free-trade and protective duties; high salaries and retrenchment; that we fancy our Cabinet must dwell in a very misty region and, perhaps, look at questions of trade, pla n and obvious enough to indinary mortals, through a St. Lawrence on a warm summer day : which presents to the eye of the beholder, the pheno mens, of ships reversed and sailing along th In the year 1850, the quantity of flour, h descended the St. Lawrence Canals, up to the 31st day of August, was twenty-five per cent less, than the previous year; what a com-mentary upon Colonial legislation?

the number of tons carried through the Canals. the number of tons carried through the Canals.
We are well aware, that her surplus of wheat,
this year, will exceed any former period;
but we are fairly justified in holding up to

reprobation, a policy, whereby those Canals, which have plunged the Province into debt,

should apparently fail in realizing the purpose for

which they were constructed; and whereby the leading article of export, should be diverted from

marks about the Cunard steamers even under the modified view of the case, it seems that the fastest beats are to run direct, and the slow boats touch at Halifax. It is easy to predict that all the passengers will resert to the direct line;

THE CURAND STRAMERS—A doubt having been intimated in a St. John's paper as to the truth of the announcement, that the Cunard stamers would not stop at Halifax beneather, we are allowed to state that the new areangement has not yet been completed, but soon will be. In the new contract between the English Government and Mr. Cunard, extending to 1860, the direct route of the New York boats is smeeted to. The dies will accordingly make her next trip direct from this city.

Wassingers September 18, 1900.

RESURPOCEST OF ZEADS WISH CANADA.

RE. Hamila, Acm. the Committee of Crimineres, reported a hill for the free mangation of the St. Lawrence trivet, and to washink reciprocity of rank white Canada.

This is in the American Sponte; but as there are now only sight days during which the Session of Congress will last, it appears highly improbable that the Bill will pass.

MONTREAL PROVIDENT AND SAVINGS BANK.
WITHIN Bristow, Jean D. Bernard, and Willien Sualth, Esquires, have been appointed Comliam Snath, Equires, have been appointed Com-missioners under the Act 13 Vic., Chap. 98, to inquire into the affairs and management of the Montreal Provident and Savings Bank. The Commission was received in Montreal on Friday.

Source at East Church.—This agreeable meeting took piece on Thursday arening, but was meeting took piece on Thursday arening, but was small be considered as it would have been, had it not rained so heavily. There were, however, a goodly number present, and the meeting passed of with great harmony. The Rev. H. Wilkes was in the chair, and the meeting was addressed by some commercial information of a kind that doesn't availy find its way into the market columns of The Albion, and which may be of an small interest to some of your more susceptible.

The reviving faste for costly jeweller
ced by the London correspondent of the

BENL WORKMAN & Co

pasts you may judge, when to one neckage compasted of them there is a diamond pendust, and that only straw coloured, price £500. The money value of the stock of this kind is perfectly incredible, considering the almost microscopic spaces to ecupies, a single case exceeding £50,000. These enormously couly articles, but more especially in the dressing case line, are chiefly for the Russian nobility, whose appreciation of such matters is mainly guided by the immensity of pecuniary outlay in their acquisition. Hence it is not unusual for a Russian Prince to give £1,200, or even £2000; for a dressing case, which, to be sure, when opened out, makes a whole toilet service, covering a large table, and the pinz of the Tartan Adonis is reflected to if hair, a thousand times over, in burnished aliver, and crystal, and gold. Hancock is purveyor of these and the like commedities to the Court of St. Peteraburgh; and hence he was selected by Prince Demitoff to manufacture the sumpinous aliver mess—box that personage lately presented to the Honorable Colonel Maule, of the 79th Highlanders, as an acknown lodgment of civilities received from the officers while at Gibralian. Don Offa and One, and Ouklys, and Pouskys, and Wowskys, may be encountered by the dozen at Borton street, and there you may learn the turiff of all the treasures of certs throughout Europe, from the toe of the last statue dug up at Herculineum, to the Cabul Mountain of Light, with the sight whereof Her Majesty now regales her Windan guests effectioner occasionally. It appears that its value has been understood, or rather the value of the set of diamonds whereof the Mountain forms the centre of the set for its seems that the brilliant on either aide of it is worth £10,000. Lord Normanby is the authority for the accuracy of this apprisement, and a more learned connoisseur than Constantine in another more occasionally. It appears that its apprisement, and a more learned connoisseur than Constantine in another more descent live, though even he shrinks from comput

the Press can be perverted."

My acquaintance with the City of Montreal, was not the result of ciriosity or accident; the came of my visit is stated in fire lines, but those five lines embrace a history of conspiracy, violence, and perjury. I may be parknowed again repeating them. The Herald asserts, "that I was forcibly and violently kidanpped in Upper Canada, and brought into the president of this section of the Protince, by the very parties who made outh that I contemplated losting it." It is more than probable that I may eventually lay before the once prejudiced public a succinct attacment of my first intraduction to the Lower Canada legal authorities, my embassion of my legal authorities, my embassion of the lower canada legal authorities and legal authorities and legal authorities and legal authorities and legal auth

the more subtle, treatment to which any pure was subjected.
