The following resolutions were also passed:
Moved by Controller J. J. Ward,
Toronto, seconded by John A. Chisholm, Cornwall: That the thanks of the Catholic Foresters of Ontario, as represented by this convention, are due and are hereby tendered to the Mayor, City Council, and citizens of Chatham, for the generous and warm hearted welcome and reception extended to the delegates of this convention.

rendered in honor of this convention, and in which all members of the convention were proud to have the privilege of participating.

That the thinks of this convention are also due and are hereby tendered to Rev. Father Brady, of Wallaceburg, in appreciation of the magnificent sermon which he delivered during High Mass. We were all deeply moved by his wonderful words, and will long remember the beneficial lesson which he conveyed.

Be it further resolved that a copy of this resolution be transmitted to the Franciscan Fathers of Chatham and to the Rev. Father Brady of Wallaceburg.

The proceedings of the convention were mostly of a private nature, pertaining as they do to, a secret society. That the papers were able to give such extended reports is chiefly due to the courtesy of Mr. Vincent Webb, the secretary, Mr. Mullen, of Ottawa, who acted as his assistant, and the members of the press committee appointed by the convention. Of this committee Mr. MacCormick, of Cornwall, was particularly thoughtful and obliging. Mr. MacCormick is himself an able and experienced newspaper man, and he knows how to treat his conferers in royal style. royal style.

Why Penmen Get Tired.

The average person has no idea how much muscular effort is expended in writing a letter. A rapid penman can write thirty words in a minute. To do this he must draw his pen through the space of sixteen and a half feet. In forty minutes his pen travels a furlong and in five hours a third of a mile. In writing an average word the penman and in five hours a third of a mile. In writing an average word the penman makes in the neighborhood of sixteen curves of the pen. Thus in writing thirty words to the minute his pen would make 480 curves, 28,060 curves an hour and 86,400,000 in a year of 300 days of ten hours each. The man who succeeded in making 1,000,000 marks with a pen in a month was not who succeeded in making 1,000,000 marks with a pen in a mouth was not at all remarkable. Many men make 4,000,000 while merely writing.

To tell our own secrets is generally folly, but that folly is without guilt. To communicate those with which we are intrusted is always treachery, and treachery for the most part combined

The bounty of nature is too little for

with folly.-Johnson.
