DEERINGS AND INCOMPALED ST

len Employed in the Building Trades and at the Deering Works, Steel Plant and Other Industries Petition the Street Railway Company Mamit Ticket Privil

Hamilton is growing so rapidly in the north eastern section, and so many men are already employed there, that their fares on the electric railways amount to quite ar item; so much so, in fact, that the men think they are justified in asking for better rates. To-day they have sent a petition to the Street Railway management, setting forth their view, and the following let-ter to the Times, received yesterday, explains their position

To-morrow several hundred men, employees of the Hamilton, Steel & Iron Company, Limited, The Bridge employees of the Hamilton; Steel & Iron Company, Limited, The Bridge Works Company, the employees of the contractors engaged in building the Deering factories, as well as the direct employees of The International Harvester Company, will petition the President and directors of the Hamilton Street Railway Company to give favorable consideration to a request that eight tickets for twenty-five cents be issued for use as far east as Irondale station, between the hours of 6.30 a.m. to 8.30 a.m. to 8.30 a.m. to 8.30 a.m. to 8.30 a.m. to 150 p.m., and that a service be given to and from Irondale every ten minutes.

To the foregoing might be requested a car to leave Deering and Sherman avenue, at 4.15 p.m. every Saturday.

To the writer it seems that the petition should be unnecessary, for the service as at present rendered is not adequate nor sufficient, besides a real live superintendent would be constantly on the look-out for a carload of passengers, and run his cars at any time that would best

The petiton, however, is both reasonable and requisite. Some of the encyloves begin work at 7 a.m. Masons, bricklayers, moulders, and the majority of the carpenters quit work at flive p. m.

The Deering employees at 5.30 p. m., except on Saturdays, when the fatter quit at 4 p. m. A number of laborers, teamsters, etc., quit at 6 every evening, and all are anxious to reach their homes in Hamilton as quickly as possible. Who can blame them then for petitioning?

Mr. C. K. Green, the traction manager, stated this morning that he had not yet received a petition from the several hundred workmen mentioned 'above. He said that for some time past the company has been approached by workmen who want to get a rate of eight tickets for twenty-five cents, but so far the company had done nothing in the matter. Mr. Green intimated that the present rate, which is six tickets for a quarter, on the Radial, and ten cents for the round trip, to Irondaie and return, from any part of the city, is about the best that the rompany would do.
