THE BIBLE AND SCIENCE. The Century Magazine will take up the Bible and Science controversy. In the November Century, Professor Charles W. Shields, of Princeton, answers the question "Does the Bible contain Scientific Errors?" with an emphatic no. He says; "Literary and textual obscurities there may be upon the surface of Holy Writ, like spots upon the sun, or rather like motes in the eye; but scientific error in its divine purport would be the sun itself extinguished at noon. Such a Bible could not live in this epoch." Professor Shields's article will be follow-
