# The Evening Chit-Chat

By RUTH CAMERON

In a little commentary on the characteristics of the French people I was much interested by this paragraph:  
 "The advent of a baby into a French family means the opening of a bank account. If its mother and father are humble people, such as those who do ouicierge work in apartment buildings, then they give to this baby whatever they gain from blackening the shoes and whatever tips they get from opening the doors late at night. No sacrifice is too great to make for a child."  
 Isn't that a suggestion for American parents?  
 I do not mean so much the opening of a bank account at the child's birth. I suppose all parents know that is what ought to be done whether they do it or not. What I mean is the method of saving—the putting aside of the proceeds from some definite source for the child's benefit.  
 Of course, as a rule, it wouldn't be from blackening shoes.

In one family that I know of, a little calf born the same day as the baby girl, was straightway christened Louisa May's cow, and was always treated as such, not only in name but in fact. A strict account was kept of the milk sold from that cow, and all the money so brought in, and the money made later by the sale of her calves, was put into the bank in Louisa May's name.  
 Consequently when Louisa May

grew up and found that she had a talent for the violin, with that nucleus in the bank, the course at the country's best music school was not the impossibility that it might otherwise have been.

In a farmer's family the proceeds from a certain ten-acre potato field, set aside from his birth, sent the son of the family to Harvard.

Of course, the man who has a regular salary does not have like opportunities for saving. But what's to prevent any man, from the day the little foreigner makes his appearance in the home, from putting aside all the pennies that pass through his hands?

Of course the child's education is going to cost just so much money, no matter whether it be saved from some particular source or simply put aside in a lump sum each year.

I'm not trying to show that it wouldn't. All that I want to show is that there's a much more interesting way.

Also one that you will feel much less.

For if you come to regard any part of your income as not belonging to you to spend, you will straightway find that you do not count upon it, and hence do not find it so hard to put it away.

In my giving and saving I have found that out. Recently I have gotten into the habit of thinking of my earnings, not as the whole amount, but as the whole amount less the sum I have promised myself to put aside for charity and to save, and I find that it makes both the giving and saving easier.

Ruth Cameron

## Afraid of Ghosts

Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terrors it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink.

The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a sallow cheek, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. It increases the vital power, cleanses the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. "Golden Medical Discovery" contains no alcohol, whiskey or habit-forming drugs. All its ingredients printed on its outside wrapper. It is not a secret nostrum but a medicine of known composition and with a record of 30 years of cures. Accept no substitute—there is nothing "just as good." Ask your neighbors.

## Fads and Fashions.

Heels are to be lower.

Black satin tailormades are very stylish.

In materials, pied de poule is one of the newest.

Among the newest hats are very low broad affairs.

The plaited frill holds its vogue wonderfully well.

Jet for buttons is not quite as popular as last year.

The colonel's plume is more than ever worn on small hats.

Shaded automobile veils are among the novelties of the hour.

Yellow is one of the favourite colors as the summer advances.

Lace and plain linen turnovers will be worn on stocks of silk.

Patent leather belts with enamelled or jewelled buckles are in the lead.

Velvet and open work designs are seen in embroidered, laundered turnover collars.

French gowns are finished with large round collars of hand embroidered batiste.

The combination of contrasting materials is still a fashion greatly in favor.

Turbans are rising in height and also showing the narrow effect at the crown apex.

New and fetching are bags and belts of cretonne incrustated with fine white soutache.

Often the distinctive touch of the evening gown is the one rose worn on the corsage.

Scarf silk, with deep double border, is the popular gauzy material for evening gowns.

The opinion is universal that the Dutch collar effects will predominate throughout the summer.

It is quite smart to have one's belt, pumps and handbag of the same material, whether leather or velvet.

One of the newest curtains is made of green linen appliqued with a heavy patterned copper-colored Cluny lace.

Small hats of sealskin, bell-shaped, with a small brim, and military turbans, are too much in vogue this fall.

## Worst Case Of Eczema

Cure only came when doctors gave up and DR. CHASE'S OINTMENT was used.

Mrs. Wm. Miller, St. Catharines, Ont., writes:—"My daughter Mary, when six months old, contracted eczema and for three years the disease baffled all treatment. Her case was one of the worst that had ever come under my notice, and she apparently suffered what no pen could ever describe. I had three different doctors attend her all to no purpose. Finally I decided to try Dr. Chase's Ointment and to my surprise she immediately began to improve and was completely cured of that long standing disease. That was four years ago when we lived at Cornwall, Ont., and as not a symptom has shown itself since, the cure must be permanent."  
 The record of cures which Dr. Chase's Ointment has to its credit have placed it alone as the standard cure for eczema and all forms of itching skin disease. Do not be satisfied with imitations or substitutes, 60 cents a box at all dealers or Edmanson, Bates & Co., Toronto.

## Whale Cutlets.

A whaling vessel is being fitted out in a Californian port with a canning equipment in addition to the ordinary outfit of the whalers. The world has abundant resources, and those who have feared the exhaustion of supplies should take heart in anticipation of a whale cutlet.—Globe, Toronto.

# Two Women Murdered.

ROBBERY AND JEALOUSY.

Wealthy Woman's Body Found Buried in Her Own Front Yard—Pet Dog Found Her—Jealous Lover Choked Mistress and Packed Her Body in An Ash Barrel—Trunk Check the Only Clue.

Lancaster, Cal., Aug. 15.—In a shallow grave sunk in the sand of her front yard a pet dog has uncovered the body of Mrs. Frieda Schultz-Castine, a wealthy ranch owner.

Murder, with robbery as the probable motive, is suspected, and telegrams have been sent to ports and border cities between Galveston and San Francisco to arrest the woman's brother-in-law, Otto Schultz, who left here Saturday after saying he was bound for Germany.

Mrs. Castine was last seen Friday when she came here from her ranch, four miles east, to receive a remittance of \$6,000 from relatives in San Francisco.

Investigations tend to show that the woman was attacked as she drove into her yard and was thrown into the shallow hole while yet alive.

An examination by an autopsy surgeon disclosed the presence of sand in the lungs and bronchial tubes, drawn there by the victim's dying gasps.

Somerworth, N.H., Aug. 14.—The number of a trunk check is the only clue which the police have to Nicholas Capsalagos, who is being hunted for on a charge of having murdered Marissa Capsalagos, a woman with whom he lived at 9 Wallace Street and whose body was found packed in an ash barrel in the cellar of that house yesterday. Capsalagos disappeared Thursday morning and thus far the police have only succeeded in tracing him as far as Dover, a few miles away.

An autopsy on the body, which was not completed until long after midnight, showed that the woman had been choked to death, her wind pipe showing the marks of the hands of a person of considerable strength, and it is believed that Capsalagos carried out a threat to end the woman's life if she did not give up Nicholas Kallias, of Biddeford, Me., to whom she is said to have been engaged and of whom her companion here was extremely jealous. Just before her death the woman is said to have had two hundred dollars in cash which she carried in a hand bag around her neck. This has not been found.

## Empire Grows Larger.

Leopold of Belgium Left Valuable African Region to Britain by Agreement.

An odd result of the death of King Leopold of Belgium is that the British Empire has grown larger by a tract of land measuring about 150 miles by 200. This country lies at the northeast end of the Congo, and many years ago Leopold coveted it—and grabbed it—because he wanted an outlet for Congo trade on the Nile.

After some haggling with France and with the British Government, he was allowed to keep it, but in 1906 it was arranged that within six months of Leopold's death the district should be handed back to the Anglo-Egyptian Sudan.

The country is very rich, though little developed. The chief town, Lado, was founded by General Gordon, and after the Khalifa had smashed, a Belgian expedition advanced from the Congo and occupied the district.

## Hurry Ends in Indigestion

Use your teeth on your food or your stomach will suffer. Quick lunches, hurried eating, bolting food, are sure to end, sooner or later, in some form of indigestion, more or less troublesome.

## Beecham's Pills

quickly relieve the distress caused by hurried eating. They act directly on the stomach nerves and actually help the food to digest and assimilate. They are particularly good for nervous dyspepsia, bloating, hiccoughs, bitter taste in the mouth, and flatulence. With reasonable care in eating, Beecham's Pills will soon

## Concerning Twenty-Mile Pond.

Editor Evening Telegram:

Dear Sir,—If St. John's had ever received any sort of fair treatment at the hands of its rulers it would now be distinguished amongst the towns of America for the health and long life of its people. Death, except from old age, or accident, or the rigour and variability of the climate, would be a rarity with us, and a case of infectious disease would instantly set everybody guessing the foreign port whence it could have come. For there is hardly an advantage which nature could offer for the site of any town which is denied to St. John's. It lies full in the eye of the sun and catches every one of its vitalizing beams. It embraces a valley whose outlet is the wide ocean, so that it is never without a current of refreshing and vivifying air, and stagnation of its atmosphere is a thing impossible to imagine. It lies so close to the sea that its air is continually renewed, and the tang of the salt provides a tonic and stimulant which saves us from the worst effects of the contaminations which the fumes of our governing classes force us to breathe. Our town is built on the slope of a hill which is steep enough and regular enough to outline of itself the trend of a perfect drainage system. Last of all, it is furnished with a plentiful supply of pure and palatable water, and in this particular alone has man aided nature instead of warring against it. We can never be too grateful to the men who brought the waters of Twenty Mile Pond into the town; for their sake we can condone the errors and stupidities of those other men who have failed to make a good use of the system which was first created. I have said most of these things before, but there is a need to say them again at this time, and I shall be much and agreeably mistaken if I shall not have to repeat them several times in the near future. At this moment I want to emphasize the efficiency of our water supply for all our needs save that of protection against fire, and that the present system is deficient in this last particular is not due to any scarcity of water but to the negligence, ignorance, or carelessness of those who devised and instituted the last plant which was put in. There is no system of storage at all, the system of distribution has recently been demonstrated to be faulty, and provisions against waste in dry weather there are none. But that the waters of Twenty Mile Pond afford us a plentiful supply of the best water for consumption and for cleansing purposes it would be idle to deny. For sixty years we have been drawing practically our whole provision of drinking water from this source, and during all that time there has not been one single authenticated case of any infectious disease arising through the impurity or contamination of this water at its origin in the Pond. It happens to us at rare intervals to suffer from a partial drought, but even at such times it has been impossible to trace any of the infectious diseases which naturally afflict a town at such seasons to any pollution of the water at the Pond. What diseases have then arisen are all referable to contaminated wells or streams in the suburbs or to cesspools and neglected drains in the town. In such seasons it is wise, of course, to take the utmost precautions to distrust the purity even of Twenty Mile Pond and to hold its water; but to compare the dangers of our water supply with the dangers of our drains, sewers, cesspools and general insanitary conditions is a height of folly to which none but our City Fathers could ever rise. But they have risen to heights superior to this, for during the last period of drought they went frantic over the perils of the water supply and were absolutely blind to the perils arising from the filth of the town. The monument of this folly is the project to buy out the farmers around the Pond and to create, at huge expense to the town, a reserve all round one of the purest water sources any city can boast. I am not, as I have said before, an enemy to the purchase of this land or the creation of this park. I am willing to take the most extreme precautions against the remotest possibility of danger to the health of the town; but when the expense involved in this enterprise is altogether beyond our means and necessitates the abandonment of precautions absolutely essential to the well-being of our people, I am constrained to raise my protesting voice. And this is exactly our present situation. The Legislature has offered us a grant of \$20,000, the interest on which we must continually

pay, and the principal of which we must eventually liquidate, for the purpose of buying out the farms near the Pond. We already know that the valuation put upon one single farm is \$10,000, or half the whole grant, and we can estimate what must needs be spent before the whole margin of the Pond becomes ours. And until we get the whole we are as well off without any. We need that \$20,000, and need it badly, but it is for the purpose of establishing a sanitary system within the town itself and not for the purpose of fighting a danger which is wholly remote, which has never menaced us in the past, and may never endanger us in the future. Until we have made the town clean and wholesome to live in we can afford to run the unlikely risk of suffering from any pollution of the waters of Twenty Mile Pond. When we are able to fight the disease which is always breeding under our very noses we may reasonably take our measures against the peril which looms dimly up in the very distant future; but not till then. Let us prepare to meet the enemy which is at our gates before we enroll ourselves in opposition to the enemy which is not yet recruited. This question is of infinite importance to this town now. I drew public attention to the matter when the late Council was still in office and asked that some information should be vouchsafed to the public, but no answer was given. At what I think was the very last meeting of the old Board a letter from Messrs. Hill was read thanking the Council for its generosity in the matter of the pre-emption of their land, so I presume that so much at least of the land around the Pond has been taken over. Before any further progress is made in this outrageous folly I ask the present Council to condescend to give us some information concerning the present position of affairs, and I further ask them, before taking any decisive steps to pledge the town to a continuance of the policy inaugurated by the late administration, to seek the opinion of our citizens and subject the whole question to public criticism. There are many aspects in which this question may be viewed and I propose to discuss some of them in a future letter.

Yours truly,

REFORM.  
 St. John's, August 22, 1910.

## Personal Notes.

Mr. R. Dowden, of the Herald staff, who spent a holiday along the line, returned to town by last night's train.  
 Very Rev. Dean Born, of St. Patrick's, Riverhead, celebrated his Feast Day on Sunday last, which was the 43rd anniversary of his ordination to the priesthood. The venerable Dean was ordained by the late reverend Bishop Mullock. He is a faithful and zealous priest and many of his friends, including his aged sister, Mrs. Jos. English, called on him and tendered their congratulations.

## IT WOULD GIVE A DYSPEPTIC AN APPETITE

Just to walk through our stores. There is seldom such an array of Dainties spread out before one.

A few of these "palate-pleasing" goods, at "purse-pleasing" prices are:

- Soups, Assorted, 1 lb. tins, each . . . . . 10c.
- Salmon, "Red Cross Brand," 1 lb. tins, each . . . . . 16c.
- Sardines from 7c. to 35c. per tin.
- "Ingersoll" Cream Cheese, 1/2 lb. blocks, each . . . . . 16c.
- "Ingersoll" Cream Cheese, 1 lb. blocks, each . . . . . 30c.
- Lunch and Ox Tongues from 22c. to \$1.50 per tin.
- Boar's Head, in glass, each, 45c.
- Potted Chicken, boneless, per tin . . . . . 35c.
- "Lea and Perrin's" Worcestershire Sauce, small, medium, large bottles.
- Harvey Sauce.
