SOLIGNUM.
 A Remarkable Test! Locally made by Messrs. W. & G. RENDELL.
 To test Solignum as a preservative for Wood against the attacks of Worms, we tried a piece of 4 spruce, about two feet in length, by painting one-third with Solignum, leaving the balance clear wood, this was suspended by a wire through the centre, in the water about one foot from the bottom, immediately over a pile of stones the remains of a sunken wharf (which is the place where our Wharf Shores are eaten off first) for Three Months. On taking it up at the end of that time we found some half-dozen small holes, only a very short distance in the clear part of the wood, which shows the liquid had penetrated through the whole piece and the worms had hardly begun boring before coming in contact with it.
 Last year as a test of some brands of Copper Paint we handle, we had a similar piece of wood treated at both ends, leaving the centre third clear; this was in exactly the same place as the piece for the Solignum test for Three Months and Three Days, when taken up the painted ends were perfect but the centre was riddled with worm holes.
 Both these pieces of wood are to be seen at our Office by those interested in the preservation of Wharf Piles or any other wood work.
 Solignum is For Sale in 1 & 2 gallon tins in Newfoundland by W. & G. Rendell, Water St.; Ayre & Sons, Water St.; Bowring Bros., Water St.; Bishop, Sons & Co., Water Street; A. H. Murray, Water St.; C. F. Bennett & Co., Water Street; Royal Stores, Ltd., Water St.; Goodridge & Sons, Water St.
