Why Women Are Not RICH.

Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal man has five million—the woman only four and a half million to a cubic millimetre of blood.

A decrease in number of red blood corpuscles and a person "looks pale"—in fact, is anaemic, the blood does not get the right food and probably the stomach is disordered.

disordered.

Dr. R. V. Pierce found years ago that a glyceric extract of golden seal and Oregon grape roots, queen's root and bloodroot with black cherrybark, would help the assimilation of the food in the stomach, correct liver ills and in Nature's own way increase the red blood corpuscles. This medicine he way increase the red blood corpuscles. This medicine he way increase the red blood corpuscles. By assimicalled Dr. Pierce's Golden Medical Discovery. By ass lating the food eaten the system is nourished and the blood takes on a rich red color. Nervousness is only "the ery

the sport coats. Trains are mostly narrow, clinging

Mousseline or tulle draperies are held by satin roses. Persian coiffures are still very

much seen for evening. It looks as if covert cloths would

be in favor this spring. Virgin blue, sapphire and Dresden still hold supremacy.

All the new evening gowns have he sheerest possible bodices. Silk stockings with openwork clocks

are in favour for evening. Imported skirts of white or charmeuse are very much draped.

A great deal of black and white net is used in the shape of frills.

A robe of dark red and silver broche is trimmed with dull silver. Afternoon dresses and tailored stits will be made of corded silks.

The one corner idea holds its own in embroidered handkerchiefs. pompadour patterns are promised for

Some of the new tailored shirts are

seen in the best of children's fine dresses and make a pleasant change.

Nearly all the fashionable gowns have thin draperies narrowed toward used, epecially on black satin dresses.

are seen on evening coiffures than

Printed silk eponge will be con siderably used for collars and cuffs of

Flowered crepe de chine composes euchanting afternoon dreses for summer climates. One of the new spring fabrics looks

like a silk and wool eolienne with a Plain brown, blue and black and

ten messalines with hairline stripes never go out of favor. Printed brocade figures on soft fab-

rics and printed voiles are arriving in large assortments. The newest French boots have tops of rich brocade, which should be re-

peated in hat or costume. Never was there such a button season or buttons in such bright colors

and striking designs. Combinations of white serge skirts with colored coats promise to be in favour this spring.

Skirts in two or three tiers are claiming some attention, though it is doubtful if they are widely adopted. On the children's Russian and Nor Foulards printed in Dresden and folk dresses the trimmings are loops and buttons, belts and sashes.

Some of the loveliest new silks ar crepe weaves with large figures far of wash silk, sprigged with tiny apart and resembling block prints.

Plain white voiles trimmed with The long-waisted Russian effect is ratines are being used for little girls Bright, rich girdles of oriental or other embroidery are being much

What Waves Measure.

Measurements of waves taken "by finding the height above the ship's water-line from which a neighbouring wave-crest just intercepts the horizen." according to Dr. Vaughan Cornish, a great authority on the subwithin one foot in ten when made by a practised observer.

From time to time one reads in the papers of waves 80ft., 90ft., and even however, are quite inaccurate.

During ordinary storm gales large waves in the middle of the North Atlantic are usually some 40ft. to 45ft. in height: though the late Lord Kelvin said he once measured a momentary neak of water 60ft, high. In the

Headachy, Bilious, Upset? 'Cascarets.'

Bilious, throbbing hendache means Bowels are clogged and liver stagnant-you need Cascarets.

You're bilious, you have a throbparched. No wonder you feel ugly, and bowels clean; stomach sweet and your head clear for months. Children love to take Cascarets, be cause they taste good and never grip

> Idleness. BY H. L. BANN.

ness and a curt note informing t h e addressee that the under signed will try without him aft-

and will cause a man's ambition to curl up at both ends and run

After an employer has enjoyed a feast having his entire crew inoculated with the hook worm, he will wish with nothing to do but run around n a red flannel undersuit and nobody

An idler is a procrastinator, and a does anything to-day that can possibly be put off until the week after next. There are a great many excuses for idleness, the most common of which is a tired feeling in the soles people in this world whose underpinning has become so exhausted that they can't go down to the creamery ing down on a dry goods box and resting their feet with one hand,

while discussing the tariff with the appointment to young brides who didn't know what they were getting at the time they signed up. Every year thousands of young men get married who never do any hard work except kick about the high cost of living. An idle husband, who calls it a day's work to change his necktie; can put love's young dream on the hummer quicker than any other affliction. Idleness is a great luxury, which vies with the electric toaster and the limousine foot-warmer, but it is fatal

The publisher of the best Farmer's paper in the Maritime Provinces in writing to us states

"I would say that I do not know of a medicine that has stood the est of has been an unfailing remedy in our household ever since I can remember. and has outlived dozens of would-be competitors and imitators."

South Pacific 50ft. waves are very, very exceptional. In the China Sea they rarely attain a height of more than 20ft .; whilst, even in the stormy Gulf of Lyons a 30ft. wave indicates

really bad weather. The wave, therefore, which struck and almost wrecked the P. & O. liner Narrung of Ushant last Christmas must have been indeed a monster. Mr. Postler is, no doubt, "a practised observer" at 70ft.; and this figure must be regarded as fairly accurate, for an experienced ship's officer such as Mr. Postler is, no doubt, "a practised observer" within Dr. Cornish's definition
