Liberal Tariff Platform.

We, the Liberal party of Canada, in convention assembled declare:

That the customs tariff of the Dominion should be based, not as it now is, upon the protective principle, but upon the requirements of the public service.

That the existing tariff, founded upon an unsound principle and used as it has been by the Government as a corrupting agency, wherewith to keep themselves in office, has developed monopolies, trusts and combinations;

It has decreased the value of farm and other landed property;

It has oppressed the masses to the enrichment of the few;

It has checked immigration; It has caused great loss of population;

It has impeded commerce; It has discriminated against Great

Britain. In these, and in many other ways, it has occasioned great public and private injury, all of which evils must continue to grow in

intensity so long as the present tariff system remains in force. That the highest interests of Canada demand a removal of this obstacle to our

country's progress, by the adoption of a sound fiscal policy, which, while not doing injustice to any class, will promote domestic and foreign trade and hasten the re turn of prosperity to our people.

That to that end, the tariff should be reduced to the needs of honest, economic

That it should be so adjusted as to mai free, or to bear as lightly as possible up the necessaries of life and should be arranged as to promote freer trade w the whole world, more particularly Great Kansas, Wichita and other places in Britain and the United States.

Kansas, besides the pension he drew from We believe that the results of the prothe English and American Governments, tective system have grievously disappointed thousands of persons who honestly sup-ported it, and that the country in the light he never spent a cent, but lived in squalor of experience is now prepared to declare for a sound fiscal policy.

The issue between the two political parties on this great question is now clearly defined.

The Government themselves admit the failure of their fiscal policy, and now profess their willingness to make some changes, but they say that such changes must be based only on the principle of protection.

We denounce the principle of protection as radically unsound and unjust to the masses of the people, and we declare our conviction that any tariff changes based on that principle must fail to afford any substantial relief from the burdens under which the country labors.

This issue we unhesitatingly accept and upon it we await with the fullest condence the verdict of the electors of Canada.
