START OF ANOTHER NEW RAILROAD

First Sod Turned for the Ontario
and Temagami Line—a
Notable Event.

Sturgeon Falls, Aug. 2.—A notable event in the history of Sturgeon Falls took place Monday when the ceremony of turning the first sod for the Ontario Northern and Temagami Railway was performed.

The Ontario Northern and Temagami Railway Company hold a charter for the construction of a railway northward from Sturgeon Falls, through the rich valley of the Sturgeon River to the southwest arm of Lake Temagami and southerly from Sturgeon Falls to the mouth of the French River or Brant Inlet.

The construction of this railway means much to Sturgeon Falls, and will be of advantage to the Province as a whole.

The new railway will provide excellent connection with Eastern Ontario in its southern extension, where it will form junctions with the Toronto and Sudbury branch of the C. P. R., the Mackenzie and Mann road, and a possible branch of the G. T. R. from Scotia Junction to Sudbury, connecting with the Grand Trunk Pacific.

Many settlers have already gone into the region south of Lake Nipissing and the Valley of the Sturgeon River is dotted with growing settlements, so that the route of the railway will take in a district already settled.

The ceremony began by a few remarks from the president of the Ontario Northern and Temagami Railway, John Craig, who called upon O. Aubin, M. P. P., in behalf of the Province of Ontario, to turn the first sod.

The second sod was turned by John Craig, as representing the railway company, and Mayor McKee, in behalf of the town of Sturgeon Falls, finished the ceremony by turning the third sod.

SERIOUS EPIDEMIC IN ESSEX COUNTY

An Outbreak of Horse Cholera
—Dominion Inspector Sent
to Investigate.

Amherstburg, Ont., Aug. 2.—At the request of A. H. Clarke, M. P., Dr. Perdue, Dominion veterinary inspector, was ordered by the department of agriculture to investigate a serious outbreak of horse cholera in South Essex.

In the past ten days some twenty-five animals died in Malden township, while the disease exists on nearly every other farm there.

A similar condition is reported from Colchester South and Gosfield South townships. Animals are first attacked with colic, which develops into acute dysentery, the animals dying in from five to eight days.

These epidemics have been intermittent for four or five years.

The cause is believed to be fish flies dying in the hay and being eaten by the horses.

This outbreak is much more serious than any heretofore, and post-mortems will be held on deceased animals and specimens of the internal organs will be sent to the bacteriological laboratory at Ottawa for examination.

The result of Dr. Perdue's investigation will be embodied in a report to the Government, along with suggestions for checking baggage.

The farmers in other affected districts have made a request to the inspector make similar examinations for them as quickly as possible, their losses being alarming.

FIRST AID SAVES BROTHER

Improvised Tourniquet Checks the
Flow of Blood.

Chicago, Aug. 2.—James Hopkins saved the life of his brother Robert yesterday by promptly twisting his handkerchief into a tourniquet, and checking a profuse hemorrhage from Robert's left arm, Robert, who is 19 years old, shot himself while gunning. The surgeons in Fordham Hospital say he will probably lose his arm.

The brothers, taking two shotguns, started in a boat from James' home. After rowing a while they found the tide strong that James was put ashore. James, who was in a hurry to shoot, seized his gun by the muzzle and the tide strong that James was put ashore. James, who was in a hurry to shoot, seized his gun by the muzzle and the tide strong that James was put ashore.

James jumped into the creek and swam to the boat. The blood was streaming from Robert's arm, and he realized that the might bleed to death quickly. James coiled his handkerchief, ripped off Robert's shirt, tied the handkerchief around the arm above the wound, put a piece of wood between the arm and handkerchief, and by twisting the wood, that he controlled the hemorrhage.

The surgeon at the hospital dressed the wound temporarily, and told James that he had not given quick and efficient "first aid" his brother would have died from loss of blood.

Growth of Winnipeg.

Winnipeg, Aug. 1.—The number of building permits in Winnipeg in July best all records, aggregating \$700,000.

Plan to Rival Trusts.

Detroit, Mich., Aug. 2.—It is probable that one result of the convention, to be held here next week, of the independent bakers of the United States and Canada, will be the organization of a combination of independent bakers, more powerful than the National Biscuit Company. The convention meets here Aug. 7 to 10, and delegates from all parts of the United States and Canada are expected.

Dean to Rupert's Land.

Winnipeg, Man., Aug. 2.—J. P. Coombes, senior canon of St. John's Cathedral, has been notified by the Bishop of Rupert's Land that he is appointed dean of Rupert's Land, succeeding the present archbishop. The new dean has been a member of the chapter for 22 years, and is a member of the M. A. of St. John's College, Cam-

HEAVY INDEMNITY PRICE OF DEFEAT

What Conquered Nations Have
Had to Pay—France Gave
Germany \$1,000,000,000.

London, Aug. 2.—Baron Suymatara, writing to the Outlook, declares that his country will never enter into a peace agreement with Russia the terms of which do not stipulate the payment by the conquered of an indemnity. He "thinks" this should amount to at least \$500,000,000.

When, in 1896, the Græco-Turkish war ended the Sultan demanded an indemnity of \$50,000,000. The powers promptly interposed; said that the sum was excessive, and Abdul Hamid II. cut it down four-fifths. In the nine years that have since intervened he has received something more than of this \$10,000,000.

The same amount—\$10,000,000—was the payment which China made England at the close of the Taiping rebellion (1850-1864), but this was nominal merely, and insisted upon more, because of the effect it would have upon the Orientals than for the actual repayment of Britain's fighting expenses, for she had paid out fully \$25,000,000 to win.

Earlier than this (1810-1842), when the red-coated warriors of "The Widow of Windsor" had won that bitter struggle with the Chinese, called the opium war, the Emperor agreed to pay \$25,000,000. A goodly portion of this indemnity, however, went to British merchants as compensation for the destruction of their property by the natives, and as the war had cost the home government all of \$10,000,000, the victors made no money.

In 1866 Prussia closed a war with Austria much more advantageously. All told, the fighting had not lasted two months, nor was warfare then the expensive thing it has come to be today. Yet Austria, with her five lesser allies, was forced to agree to an indemnity of \$22,500,000.

Eleven years later, in 1877, Russia, having beaten the Turks, kept her financial demands to the actual cost of the war. She asked \$160,000,000, and Turkey agreed.

The greatest indemnity ever asked was the \$1,000,000,000 which the new-born Empire of Germany demanded from the French in 1871. To obtain this in calculating the amount, Bismarck telegraphed to Berlin for Herr von Bleichroeder, the Rothschild of Prussia, and this financier first fixed the damages at \$1,200,000,000. M. Thiers objected to this and the amount was reduced to \$200,000,000. He went back home declaring so colossal a debt could never be liquidated. But paid it was, long before the time appointed.

What Germany had spent upon her war was less by many millions than this indemnity, and tradition has it that the First William and Prince Bismarck never ceased to regret that they did not ask double.

"WAYS THAT ARE DARK"

Michigan Minister Cashied a Bogus
Check and Disappeared.

Hastings, Mich., Aug. 2.—Rev. W. D. Clarke, pastor of the Congregational Church at Freepoint, has created quite a sensation in that western village. A week ago Clarke received a check, through the mail, the envelope addressed in what appeared to be a lady's handwriting. He cashed the check, which was made out for \$300 and signed "Helen Hilton" on a Dayton, O. bank, at a Freepoint bank. About an hour later he disappeared, and has not been seen in Freepoint since.

Thursday the bank grew suspicious and wired the Dayton bank, which knew no such person as Helen Hilton. A warrant was at once issued for his arrest, but so far his whereabouts have not been discovered.

Clarke is about 40 years old and is married. About eighteen months ago he came to Freepoint from Dayton, O. He was well liked in Freepoint until a short time ago, when financial matters began to press him and he borrowed from anybody he could.

He was seen in Grand Rapids last week, and he is reported to have been seen in Belding last Friday. The officers have gone to look for him there.

SLAVERY IN ALASKA

Teacher in Aleutian Islands Village
Finds Girls in Bondage.

St. Louis, Aug. 2.—In a letter to St. Louis friends Prof. William A. Davis, of the United States public schools at Unalak, Alaska, declares human slavery exists in the Aleutian Islands, and that he has been unable to get the United States authorities interested in the matter.

"At the beginning of the school year of 1903 I canvassed the village of Unalak for scholars," he says, "and I found eight little girls ranging in age from 6 to 12 years in slavery as domestic servants."

"I called the attention of the authorities to the fact, but up to the present time nothing has been done of it. By individual effort, however, I have secured the release of two of the girls, who were returned to the island from whence they came, and all probability were sent away again at the first opportunity in some other direction."

"Their bondage is as servile as that of the blacks before their emancipation, and it is safe to assume that the same conditions prevail all over Alaska."

Early Harvest.

Winnipeg, Aug. 2.—The wheat crop of the Northwest Territories will be moving this year as early as Manitoba's.

Edith Kenward's Body Cremated.

Paris, Aug. 2.—The body of Edith Kenward, a playwright, formerly a theatrical manageress in New York, and later the Paris correspondent of a New York dramatic paper, was cremated this morning at Pere La Chaise. Her death was the result of an intensely painful internal complaint, which necessitated numerous operations.

The Source of Neuralgia.

It runs hand in hand with poor blood and weak nerves. Health runs down, nerves get irritable, neuralgic tortures follow. For the moment applications may relieve—but to thoroughly cure, the system must be strengthened with nutritious blood.

What can equal Ferrozone? It increases the appetite, forces abundance of rich, life-giving blood, supplies nutriment and building material for worn-out nerves. Ferrozone completely cures neuralgia. Every root and branch of the disease it kills. Absolute success in every case. Stop suffering—buy Ferrozone. Effortless—eat chocolate-coated tablets in a box, any drug store.

FRUIT

As a Medicine.

Fruit has been used as a medicine for thousands of years. Every one knows its value as a laxative. The pure juice of apples acts on the kidneys and makes more urinary excretion than any other remedy in the world—but the patient must take half a pint three or four times a day. Apple juice is most curative in kidney disease. The juice of four large oranges taken before each meal and on retiring at night has more curative action on the skin than any remedy ever discovered. Orange juice clears and beautifies the complexion. Again, fruit acts on the bowels and makes them move—acts on the liver and makes more bile flow, which is the natural purgative of the body—and thus cures constipation. An Ottawa physician after years of labor has discovered a process of combining and concentrating the juices of apples, oranges, prunes and figs—and by forcing into the united juices one more atom of bitter from the orange peel, a new fruit is obtained which has all the valuable medicinal qualities of fresh ripe fruit and in a more marked degree. The new and strong fruit condensed into tablets, made into tablets, with the addition of tonic, and sold under the name of "Fruit-a-tives" or "Fruit Liver Tablets." It has been proven in hundreds of cases that "Fruit-a-tives" are a positive cure for constipation, biliousness, headaches, kidney and liver diseases and all blood impurities. "Fruit-a-tives" are fruit, concentrated and made stronger than ordinary fruit. For sale at Druggists 50c, a box or 6 boxes for \$2.50, or sent by mail for \$1.00 per box. Write to FRUIT-A-TIVES LIMITED, Ottawa.

A GREAT SHARK VISITS PRESIDENT

An Eight-Foot Man-Eater Killed
Off Roosevelt Dock,
Oyster Bay.

New York, Aug. 2.—While fishing for bass within a short distance of President Roosevelt's private landing in Oyster Bay Dr. James S. Hall saw protruding from the water the fin of a shark. The doctor and Richard Leich, who was with him, immediately put off from his launch in a rowboat to the shore, where they procured a harpoon and casted it into the water. They found the shark still sunning itself in the warm, shallow water near the bathing beach. They attached a long line to the harpoon and rowed rapidly toward the dangerous fish. It lay motionless until the rowboat was almost directly over it.

Dr. Hall, who is one of the most powerful men in the New York Athletic Club, stood in the bow with the harpoon poised in the air. As the shark started rapidly away the doctor plunged the harpoon with full force into the water and caught the monster just behind the head. In his frantic effort to get away it towed the rowboat for some distance, leaving behind a trail of blood.

Lashing the sea, it was dragged by the doctor and Mr. Leich to the beach, where it was found to be of a dangerous species. It measured eight feet in length—the largest shark ever killed in the vicinity of Oyster Bay. While returning to the launch the doctor saw and harpooned another shark, which was not full grown.

The doctor's exciting experience and the fact that the sharks were killed in close proximity to several bathing beaches, including the one used by President Roosevelt and his family, have caused Dr. Hall to make preparations for a shark-hunting expedition upon which he will be accompanied by several friends, all armed with harpoons and all intent upon ridding the bay of these monsters.

The sharks have not only frightened the bathers, but have destroyed the Waldorf-Astoria Hotel on Friday night. The sharks have not only frightened the bathers, but have destroyed the Waldorf-Astoria Hotel on Friday night. The sharks have not only frightened the bathers, but have destroyed the Waldorf-Astoria Hotel on Friday night.

JUDGE FINED HIMSELF

Forced Money On a Vagrant By
Threat of Imprisonment.

New York, Aug. 2.—In the Jefferson market police court Magistrate Wade handed several bills across the desk to a man arraigned as a vagrant. The prisoner raised his hands in protest and said: "No, judge, I cannot take that money. I could not think of such a thing."

"Well," said Magistrate Wade, "you take that money or you go to jail. You have your choice." The prisoner then accepted the money, providing the magistrate would consider it a loan.

Albert Crowell, 39 years old, a tobacco merchant of New York, was the man arraigned. Crowell was arraigned by Detective Walsh, who was accused by him in front of the court of having stolen a diamond ring from him. Crowell asked him for car fare to the pier, where the Old Dominion Line steamship docked, and said if he could not pay the fare he would stay in the Old Dominion Line pier he could get transportation to his home.

BRIDEGROOM WORE WHITE

Wedding at Elizabeth, N. J., a Sym-
phony Immaculate.

Elizabeth, N. J., Aug. 2.—Mrs. Julia d'Anterchones Jones, daughter of the late Mr. and Mrs. J. Augustus Dix, of this city, was married at noon to Lewis A. Stout, of Tuxedo, N. Y., at the home of her brother, Warren R. Dix, by Rev. Otis A. Glazebrook, of St. John's Church. Only members of the families and a few friends were present.

There were no bridesmaids. The bride's little son, Eugene Jones, attended his mother as page. Mr. Stout was attended by his brother, James Stout, and the bride's brother, Warren R. Dix, gave her away.

The costume of the bride was of white chiffon. She wore a white picture hat, trimmed with ostrich plumes, and carried an armful of sweet peas. The bridegroom's clothes were an innovation. He wore a white serge suit, white shirt and white shoes. The best man and the groom were similarly clad. The house was decorated with white roses and white sweet peas.

Piles

To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturer has guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. See a box at all dealers or EDMANSON, HARRIS & CO., Toronto.

Put Some Flags Out Hang Out Some Bunting.

It's a happy time this—comes once in fifty years. London has grown big, prosperous and pretty. We all should be glad enough to

FOUND IN DIXIE

Last Bullet of U. S. Civil War Taken
Form a Soldier's Jaw.

Raleigh, N. C., Aug. 2.—A very singular relic has been received here and placed in the state's historical collection in the Confederate section, being a minute bullet, which was shot into the right jaw of John Lindsey Shearman of the Thirtieth North Carolina Regiment, in the brigade of General William R. Cox and the division of General Bryan Grimes. Shearman was thus wounded after the surrender at Appomattox, having been struck while his command was in a field at Appomattox, falling back to take position after the surrender had been announced. The bullet yet bears blood stains.

ROCKFELLER CUTS PAY

Old King Reduces Laborers' Wages
25 Cents Per Day.

New York, Aug. 2.—It is reported that John D. Rockefeller has begun retrenchment in his private expenditures, the first move in the reduction of expenses having been made on his Lakewood estate, where the wages of five laborers have been cut from \$1.20 per day to \$1.25.

The services of the superintendent, who enjoyed \$100 a month salary, have been dispensed with, and the saving amounted to \$5 per day.

The reason for the action on the part of Mr. Rockefeller is not known, but there is fear among all the employees of the oil magnate that his employees may have been depleted lately, and that the \$5 per day saving will not be sufficient to restore it to its old figure of \$100,000 per day.

It is said that Mr. Rockefeller will look after his Lakewood estate himself, and that this is the reason for the discharge of the superintendent.

NESTLE'S FOOD

Means Healthy Babies

Nestlé's Food has nourished three generations of sturdy children. Nestlé's Food is used by thousands of mothers, who were themselves brought up on it. Nestlé's Food requires no milk—just add water.

Free sample sent to any mother who will try it.
