year 1908 that a nasty itch came through my skin, and I scratched it until I tore the flesh. I tried several contracts to no effect. I went to a skin hospital. They advised me to go to the —— Hospital, but I re-fused. I could not sleep with the constant itch. I was that way until on o about the month of January. One 'ay I chanced to see in the papers a case like mine, but I gave it no creasurce. At last I said, I will try the Cuticura Remedies. With the fire; wash and Cuticura Ointment I used, I found their effects. I got one box of the Ointment more, and in less than one week the skin was all right, and left no traces after it. I have not had a return of the same since, and I shall always praise the Cuticura Remedies as being the means of my cure."

Lord Rosebery was warmly cheered, great critical question as to the merits and the students gave him a musical welcome. He said that when he reeived the invitation to be present he inderstood that in some small and inconvenient room of the union he vould meet a few leading students-(derisive laughter)-he understood the interruption; all students believed hemselves to be leading students and discourse to them in private for five minutes on the merits of union. Instead of this, he found himself in a great hall, loaded to the roof with an enthusiastic audience. It was a sufficiently severe trial when they took an old fossil from one of the dustiest placed him on a platform, but when it was announced to the audience that ne would soon emit sweet sounds (laughter) it was enough to cow any human being and make him wish for retirement.

"The purpose of this, I understand has been changed since first I undertook to come here," Lord Rosebery continued. "We were to lay a foundation stone. That was in the middle of July. Owing to the event which put the whole nation into mourning that ceremony was postponed, and now I find that I am to unveil a figure and tablet, because the enterprise of those who are concerned with the union has already raised the structure far above the necessity of any foundation stone. I hope the same energy and munificence that has enabled these walls to be raised will enable the union to be completed within no distant time. (Cheers.)

The Older Unions. Now what is a union? ("Ah!") I am not asking a riddle. (Laughter.) I am asking you to consider with me what is the meaning of a university union. We know what a trade union is "Oh"), but a university union is omething, to those who have not been at a university, which has a somewhat mystic character. A university union, and Cambridge, where they first apterest and piquancy on such an occasion as this. Before half the first one was used my cough began to get much easier, and by the time I had used a bottle and a half my cough was gone. Now we come to Oxford. Of the Union of Oxford I confess I know very little, because though I was a member, I was a subscribing but a silent member. (Laughter.) That, after all, without disparagement to any other sort of member, is the best member that any association can have, be-cause I have always observed in the much more ready to talk than to sub-scribe. And I always understood that at that union and at most other university unions the great questions, the nteresting debates, were not on the amiliar points as to whether Charles was rightly executed or not, but on juestions of private business—wheher such and such a newspaper should be taken in and whether cigars (Laughter.) I believe the Oxford my time raged entirely Jnion of around the admission of a newspaper. t was a newspaper, now dead, over the ashes of which I still cast a tear-"Bell's Life." (Laughter.) But whether it was ever admitted to the Oxford Union or not I cannot tell to this day. (Laughter.) Well, I suppose that many of you present will be in its origin of course, dates back to inclined to think that the principal the two famous societies of Oxford function of a union is debating. Now I am not disparaging debating, but I and hail, which are characteristic of peared. What we want now in our country and in our history is action and not speech. (Cheers.) And, though I am inclined to think that the art of speaking is extremely valuable as a means of influencing your own generation and your own time and your own fellowmen, I confess I have the humblest opinion of it as any permanent agency for good. When I think of the many millions of sermons, the many millions of speeches, political, legal, complimentary, and every kind that have been poured forth in the last century on suffering mankind and of the extremely small tangible result that re-mains of all this flood of oratory that has been expended, I think you will agree with me that I am justified in my scepticism as to the great value and effect of oratory. Let your debates be dialectic, and not the expression of a confirmed and chastening faith, which you would be very unwise to declare so prematurely. (Laughter.) Ten years hence you will think probably on all subjects very differently to what you do now. Politics that are the result of reading history and of study are very apt not to stand the friction of the world, and therefore I believe that there is nothing more fatal for a young man, or a young woman either, while they are in the position of what we used to call statu pupillarae, and before they have to take the responsibility of party politics or of politics in any form-before, in fact, they have the possession of the vote, which is the only thing that necessitates their practical deals ing in -olitics, I believe there is nothing so unwise or so fatal for young people in that position to tar themselves with a particular badge and call themselves politicians before they are fitted to have a practical acquaint-ance with politics. It resulted, I must say, in a triumph for Mr. Gladstone, because he gave Mr. Disraeli a most severe trouncing. warfare of life that people are very (Laughter.) has a Sliding Damper that regulates the temperature of the oven to any degree

You know the old-fashioned flop-over damper. It has-only two positionsshut tight, which throws all the heat around the oven-and wide open, which throws all the heat up the chimney.

With such a damper, the usual course to secure a moderate oven is to open the oven door. Many a pan of bread and cake has been spoiled because the oven was cooled off this way.

The "Peninsular" Sliding Damper gives you absolute control of the heat. You can set it for direct draft, or for quick or slow bakingwide open, a little shut, one-fourth shut, half open, or the tiniest draft possible.

Simply slide the damper along the groove, and the "Peerless Peninsular" oven responds. giving you the desired temperature for any kind of baking you wish.

A Thermometer is furnished in the oven door to give you scientific accuracy if you wish.

There are many other features of the "Peerless Peninsular" that appeal to every woman who takes pride in her home and wants a range that will do justice to her culinary skill.

"Peerless Peninsular" is the range shown above.

"Adanac Peninsular" is plain in design with swing door for those who prefer it.

"Harmony Peninsular" is similar in essentials but more elaborately decorated.

"Constant Peninsular" is different from the others mainly in plainer design and finish.

> Value of Collegiate Life.

There is no collegiate life in the University of Liverpool, and therefore all the more the students' life of the university needs a centre to which it can rally, and a centre from which it can derive inspiration. The Students Union should be a clamp that binds the the whole life of the university closely together. My belief is that i find in the University of Liverpool an afk of safety from which you may be controlled by yourselves, if it starts serenely and dispassionately look out on right lines to begin with-if i on the typhoon that is raging around starts on wrong lines it will not easily you. That would have been too half, of your university training.

(Hear, hear.) Here you will come to know mankind, here you will come to form those friendships which may in some shape or another be the most delightful memorial you carry away from the university itself; here you will have the headquarters of all those students' societies which are found in every university, and which show the life and the virility of the university to be flourishing. I be-lieve, without disparagement to anything that may be done in the classroom, or the laboratories of this university, that the education which will be received inside the union will be as valuable as anything that can be taught elsewhere (hear, hear), and therefore I repeat my earnest Mrs. Alberta Goffin, a nurse, living at that this union will be regarded by the wealthy citizens of Liverpool as at their encouragement as any other part of the university, and that it will not be allowed for one month longer than is necessary to remain in its present inchoate and unfinished form.
