Its effects commence by deposition from the blood of corrupt or ulcerous matter, which is the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul comp

tion, which genders in the blood, depresses the energies of life, so that scrofulous constitution not only suffer from scrofulous complaints, bu they have far less power to withstand the attack of other diseases: consequently, vast numbers perish by disorders which, although not scroth-lous in their nature are still rendered fatal by this taint in the system. Most of the consump-tion which deciments the human family here. tion which decin ates the human family has it origin directly in this scrofulous contan and many destructive diseases of the liver, kid, neys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking infec
