The latest fad is the road－making achine．It passed throught here lasi week，leaving as an excellent piece of ine will do the work of more tha ixty men，and do it better．Premi Murray has taken a great interest in the matter，and was personally at the scene of operations three times during his re－ cent visit．The machine went from here ent writing has got as far as South Gut It is under the management of Gut． Philip McRae of Bir Farm，who evi－ dently understands the business and has made good work．One thing，however， seems to be lacking．The centre of the road is soft and porous．If people would drive properly it would soon pack
and harden，but they prefer to take the side which is a little smoother．This cannot fail to be injurious to the drains． The remedy that naturally suggests it self is a roller．If the machine wer the whole thing would be comple．
