Lawrencetown June 10 1907

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until Thursday, September 5, 1907, inclusive, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p. c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS
Secretary,
Department of Public Works,
Ottawa, August 1, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

EXECUTOR'S NOTICE.

All persons having legal demands against the estate of the late Richard Shipley, of Bridgetown, County of Annapolis, are requested to render same within three months from date thereof. All persons indebted to the said estate are hereby requested to make immediate payment to

ISABEL F. SHIPLEY,
Executrix.

14 Miles of Rambler
Roses in Bloom

(Boston Herald)

Fourteen miles of crimson rambler rose bushes are in blossom at Dreamwood, Thomas W. Lawson's farm at Scituate. It is probably the greatest rose show in the world.

The white fences around the estate, the barns, the farmhouses and the dwellings are covered with the crimson flowers that are said to be the best in richness of color and abundance of blossom that have ever been grown on a private estate.

Entering the gateway and looking up the road it seems to the visitor that an army of red roses has invaded the place and decided to patrol all the available highways and besiege the houses. The first building that one sees in getting off the train is the picturesque little office, and behind this is the post office. Both of these are overgrown with the rambler vines, and from every branch flaming clusters of flowers are looking seaward and waving, like richly colored plumes, in the breeze from the nearby ocean.

There are nearly 40 roses to each cluster of blossoms, and the number of clusters on one bush can hardly be counted. To view these separately, blossom by blossom, is a delight, but the marvel comes when the eye rests on a stretch of brilliant, vivid crimson that seems, beside its own color, to hold some of the dancing scintillations of the sun's rays. So rich in tone are the petals that the whole scheme of color seems alive and to belong to something living, not to inanimate objects, like flowers.

These are stretches of road at Dreamwood that both dazzle and delight the eye with the unusual blaze of live color.

The rose bushes number 6500 and originally they were placed 16 feet apart. It was Mr. Lawson's idea when he was planning this vast estate, to have at every other fence post along the 14 miles of fence that enclose the grounds a crimson rambler planted. This was done nearly five years ago, but the bushes were stolen almost as fast as they were set out. Mr. Lawson, however, with his usual determination, replaced the stolen ones and kept replacing them until the thieving stopped. Now the bushes are so large that it would be impossible to steal them except with a great deal of manoeuvring—too much to make the thief worth while.

The bushes were started, as Mr. Lawson planned, at every fence post, but they were rambler roses, and true to their name, they rambled. One glorious bush, just above the Dreamwood smithy, has spread along the space occupied by seven fence posts and is evidently not through with its ramblings yet. Its blossoms are just as fine, in spite of their profusion, as those on the smaller bushes.

Never before since the estate was laid out have the roses made such a fine display. Visitors from all over the country are flocking to see this interesting sight, and some eminent floriculturists have thought it worth their while to journey to Dreamwood to study the dazzling array of plants. All are delighted with what they find at the Lawson estate, for, they say, never were crimson rambler roses in such profusion and never were they so rare in color and size.

It is unusual to see so many flowers, all of one color. The dazzling whiteness of the fences, the sun around Dreamwood and the green of the rose leaves form the only contrast to the deep crimson of the thick-limbed blossoms. In some places there is no fence to be seen so thickly have the roses grown up. More plants have been set out this year, and the ones already planted will be larger next season, so that the display in July, 1908, ought to be something to challenge any similar sight in any other part of the world.

At the race track one can get the best view of the display. The mile track that goes around the polo ground is hedged with the bushes and standing in the judges' stand, one looks off over a sea of red. The Highway, as the road is called, that leads to Dreamwood Hall, the home of the Lawson family, is literally a path of roses, and the roadway that goes past the track is a glorious sight, with its banks of roses on either side.

Not only is the ornamental part of the estate decorated, but the working part of the farm, which, in this case, happens to be ornamental, also has its quota of brilliant buds. They twine on either side of the Tollway, which leads to the farming part of the estate, they climb over the smithy and the stables and cover the chicken house, which, by the way, is as aristocratic as its inmates. Each paddock pasture and driveway is ablaze with blooms, and wherever one goes on the farm, he is greeted and led on by the business of the roses. Around the paddocks the colts sometimes chew off the leads and blossoms, but they cannot get any damage, where there are so many of the rich blossoms, and their paddocks are a glow of crimson just the same.

The bushes have been in bloom for over a week, and every day brings them nearer their fulfillment of most profuse beauty, and, unfortunately, nearer their final fading and dying.

FLIES AS DISEASE BEARERS.

The Common House Variety Are a Menace to Health.

The United States Department of Agriculture has started a crusade against the common house fly and is carrying on extensive experiments as to the best way of banishing it from the abodes of man. The fly has been found to be not only a nuisance, but a menace to man's health. Its hairy body carries both disease and death. Many epidemics which sweep over communities in the hot season have been traced to the fly. Having its origin in filth, it brings with it the bacteria which breed in filth. And as it moves about, now crawling over refuse, now over the food on the table, flying from the lips of the sick to the lips of the healthy, it is said to be more dangerous to modern society than were the wild beasts to primitive man.

The high mortality among the children in the congested districts of a city, where families are closely crowded together, where refuse accumulates fast, where food is often kept in living rooms, is due to a large degree, so scientists now say, to the fly. The infant diseases which prevail in the hot season, when the flies abound. Dr. J. T. C. Nash, in the Journal of the Royal Sanitary Institute, giving his experience as an English health officer, says that the fly is responsible for the death of many children because of polluting the milk which they drink.

"It is a matter that has been entirely overlooked," said Dr. C. O. Probst, recently, "but we now know that the common house fly is an agent of importance in carrying the germs of typhoid fever. It was formerly believed that the germs were only carried in water, milk or other liquid food. Flies both breed and feed in places where the germs are to be found, and then, flying into our houses, no doubt often carry the germs and deposit them on our food."

Give the Children
A Cooling Drink of
Sovereign
Lime Juice

when they are hot and tired—and consequently restless and complaining. It cools the fever, and refreshes—it is pure fruit juice, sterilized and bottled—can be used freely with only good results.

PREMATURE BURIAL.

It appears that in England the bury of modern life has extended to the chamber of death, making the period between death and burial so short as to involve a serious danger of embarrassing the living. An association for the prevention of premature burial has been formed. At a meeting of this association, statistics were produced by two of the members, purporting to show that one hundred and forty-nine persons were known to have been buried alive, while two hundred and nineteen narrowly escaped the same fate, and ten had been dissected alive. The evidence for these cases is not given, but two medical men, Dr. J. Stenson Hooker and Dr. Brimley James, were at the meeting and seem to have accepted the facts. Nothing more horrible can be imagined. The law governing the giving of death certificates was denounced by Mr. George C. Greenwood, M. P., as scandalous. Our own form of death certificate appears to be defective. It does not give the date of the medical practitioner's last view of the deceased.

MOTHER SEIGEL'S SYRUP

Price 25c per bottle.
A. J. WHITE & CO., MONTREAL.

ELMSTON JOURNAL—If the east wishes to attract a large share of the immigration it will be necessary to make a more energetic effort in the way of an immigration campaign and educate the people as to the advantages of their particular country. It is, to be sure, only fair that the resources and industrial opportunities of New Ontario, really a wonderful northern Quebec, and even easternmost Nova Scotia, should be announced to the world together with those of our west, for there are undoubted possibilities in all the provinces for successful settlement, and as far as the west is concerned it may be taken for fact that we are not selfish nor have any desire to monopolize the good things that are coming in the way of Canada. But it rests largely with the east itself how to make eastern advantages more widely known.

BUSINESS MAXIMS.

It is a good maxim to say, "Keep out of debt." But there may be times when to apply that strictly would be the worst thing one could do. It is sometimes just as wise to go in debt and it is, at other times, wise to keep out of it. Many a business has been saved from failure by incurring a judicious indebtedness, and many a man has been able to take advantage of a valuable opportunity in the same way. Still the advice remains good, "Keep out of debt." In other words, avoid debt unless it can bring you some definite advantage.

No business maxim can be applied with the invariableness of the multiplication table. A man who has a good opening before him shouldn't place too much faith in the adage that "A rolling stone gathers no moss." Neither should he leave a good place to follow the maxim, "Sell in the best market," but he should find to his sorrow that "A transplanted tree does not always thrive." Business maxims are all right in their place—a part way of putting the thing, but many of them are only half-truths to begin with.

FOR AN IMPAIRED APPETITE.

To improve the appetite and strengthen the digestion try a few doses of Chamberlain's Stomach and Liver Tablets. Mr. J. H. Seitz, of Detroit, Mich., says: "They restored my appetite when impaired, relieved me of a bloated feeling and caused a pleasant and satisfactory movement of the bowels." Price 25 cents. Samples free—W. A. WARREN, Phm. R.

CONGRATULATIONS.

(Boston Post.)

Yesterday's news told about a Kansas bride whose eyesight was destroyed by having rice hurled at her, and of a Michigan groom who was crippled for life in a runaway caused by an old shoe which was meant to hit him, but struck the horse instead.

No other country on earth can beat us when it comes to giving good-byes to newly married couples. We leave nothing undone. In trying to show that we wish our newly-weds god-speed we leave no stone unturned. There is no length to which we will go in order to manifest our congratulations.

Naturally a bride who has her eyes put out with rice does not see the joke. She will no longer look forward to the joyous married life as she used to. The groom, who starts out upon his matrimonial venture in a wheelchair, did not contemplate doing so before he got married. He didn't know that having a cripple for life was a part of the ceremony. However, this bride and groom should not forget the spirit in which the rice and the shoe were tendered—they should take what they get as it was intended. The wedding guests meant well, you know.

It is our private opinion that there is a large number of young folks who are on the verge of matrimony and who would take the plunge without hesitation were it not for the dread of the gauntlet they must run after they are made one. It is embarrassing for a bride to lose her eyesight just when she is starting in to see if she can't keep down household expenses. It makes a groom blush to get snarled up in a runaway and be brought back in an ambulance with a dislocated vertebra.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed it has a running sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever, nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

DANGERS OF GASOLINE.

An explosion attended with loss of life occurred at Toronto a few days ago on a gasoline yacht. An expert in the handling of gasoline told a Toronto "Globe" representative that there is absolutely no danger in the use of gasoline, provided one is careful. Said he: "Gasoline itself will not explode. You may take a saucer of gasoline and drop a lighted match into it, and it will put out the match. It is only when the gas coming off from the gasoline becomes mixed with a certain proportion of air that it will explode. The danger comes only in the confining of the gas, and then on being exposed to a spark it ignites.

"You never hear," he said, "of an automobile gasoline tank exploding from any such cause, for the reason that if a man is careless in filling his tanks and lets the gasoline slop over, or if he has a leaking tank, it runs on the ground, and he leaves it behind. But let it be confined—let it run on the floor of a room or a brick stable that is shut up, and as the gas rises and mixes with the air, a spark fifteen feet away will start it. Or let it run down on the floor of a boat, or—as there is generally some water in the bottom—on the water, it will spread over and being confined the gas of course will ignite when the man starts his engine up. Or if some fellow drops a cigar stub or lighted match, off it goes. A 'snake-and-break' on the engine will explode the gas; or, if the piping is leaky or defective there is the same danger. The whole secret in handling gasoline is to see that the tanks don't leak, and to have a vent so that the gas evaporating from any slop-over has a chance to escape. Carelessness, some where is the explanation of every accident with gasoline."

Just Our Own

Dear Just Our Own Folks:
I want to tell you of a happy thought that came to one of my friends, when she had a lame foot and was unable to keep on her feet to do her housework. She had cutters put on a kitchen chair, and was then able to push herself all over the kitchen. Hoping this hint may benefit some one who may need it.

A FRIEND.

Dear Juanita, Happy Housewife and others—I am pleased to find that my suggestion for a special column of our own has met approval, and I hope our circle will expand from week to week, until the Editor may be induced to give us two columns.

I have used Juanita's recipe for Salmon Scallops and found it a nice dish to add to my summer menu. Our men folk ate with keen relish Happy Housewife's haricot steak one night after a hard day in the hayfield and I can foresee it is going to be a favorite dish in our family.

I am also indebted to some friend for the recipe for oat crispies.

Here is a recipe I want you to try during the blustery days. It has been a favorite of mine since childhood.

BLUEBERRY CORN CAKE.

1 cup fine corn meal
1 cup white flour
2 teaspoons baking powder
1 cup of milk
2 eggs
2 table-spoons sugar
1 table-spoon melted butter.
1½ cups blueberries.
1½ cups blueberries, and I know if there are any little ones in your family they will want mother to make it again.

Did you not all enjoy Lillian Gilbie's lovely poem? I hope she will come again, don't you?

ANASTASIA.

Try our FIVE ROSES or FIVE LILIES

THE FOOD VALUE OF A QUART OF MILK.

Much attention is now being paid to the selection of feeds for our farm animals and but little heed is given to the comparative value of foods for the human family. We quote the following paragraph from Prof. Atwater:

"A quart of milk, three-quarters of a pound of moderately fat beef, six-ounce steak for instance, and five ounces of wheat flour, all contain about the same amount of nutritive material, but we pay different prices for them and they have different values for nutrition. The milk comes the nearest to being a perfect food. It contains all of the necessary ingredients for nourishment, but in the proportions best for ordinary use."

Why Refer to Doctors

Because we make medicines for them. We give them the formula for Ayer's Cherry Pectoral, and they prescribe it for coughs, colds, bronchitis, consumption. They trust it. Then you can afford to trust it. Sold for over 60 years.

Ayer's Cherry Pectoral is a remedy that should be in every home. It has cured a great deal of the best of the best of the best, and I know what a splendid medicine it is. I can recommend it to you. —MRS. E. C. CONNER, Hyde Park, Mass.

Made by J. C. Ayer Co., Lowell, Mass. Sole manufacturers of SASSAPARILLA, PILES, HAIR VIGOR.

Ayer's
Ayer's Pills greatly aid the Cherry Pectoral in breaking up a cold.
