

A CLASS OF MEDICINES EFFICACIOUS AND EASY OF ADMINISTRATION.

GENTLEMEN:—

Although a practitioner of over forty years, I think I may feel privileged to express my great pleasure and appreciation of the new class of remedies prepared by you, called "Parvules." I regard them the greatest improvement in modern medicine, and I could scarcely practice my profession without them, as they are so handy, so convenient and easily taken by children and adults. Their most important quality is their unvarying and *reliable* strength and efficacy. I can obtain with a grain or less of Calomel, with a grain or less of Aloin, and with a grain or less of Podophyllin, divided respectfully into the tenth, twentieth or fortieth part of a grain, in "Parvules," all that I could desire in most cases, and in a more satisfactory manner than in the usual form. I have used successfully a "Parvule" of one-fiftieth of a grain of Sulph. Morphia repeatedly for two or three hours, and have relieved pain without the least nausea or vomiting in patients that could not bear opiates in any other form; I do not know what to attribute this to, except the peculiar mode of preparing the "Parvules," as they are so readily dissolved and absorbed after being taken, and in indorsing them I must disclaim any favoritism or sympathy with Homœopathy; a "Parvule" given every hour it will be seen is not Homœopathy, in theory or practice. I usually give two "Parvules" of Calomel every hour until six or seven doses are taken, and the result is the same as with ten grains of the same, without the embarrassing effect. I give four or five "Parvules" of Aloin, the effect is the same as four or five Cathartic Pills, also with the Podophyllin "Parvules;" they will relieve habitual constipation, derangement of the liver and digestive organs, if given, one or two, three times a day.

I have no doubt that every practitioner who will use these "Parvules" will find the same results which convinced me of their importance and convenience. I have no other medicine chest in my daily rounds, than my pocket case of "Parvules."

Yours very truly,

Reaville, N. J.,
